

### ROCK AND SOIL SAMPLE LOCALITY MAP

Shows location of rock (●) and soil (X) sample sites relative to underlying bedrock units, and area and density of sample coverage relative to location of study areas. Numbers are report sample site numbers. Complete descriptions of samples, field sample numbers, and analytical results are given in Detra and others (1990). Three-digit numbers locate sample site; for example, report sample numbers 273A, 273B, and so on, are all from site 273, this plate. Refer to Plate 1 for Description and Correlation of Map Units and explanation of other map symbols.
