

EXPLANATION

-  Bedrock concealed by sand dunes
-  Outcrop of top of Fusulina-bearing sandstone
-  Outcrop of top of Avant limestone
-  Outcrop of top of Dewey limestone
-  Fault  
U upthrow D downthrow
-  Structure contours  
*(Drawn from surface observations to show structure of a theoretical bed 635 feet below top of Fusulina-bearing sandstone. Figures show elevation above sea level in feet. Contour interval 10 feet.)*
-  Gas well
-  Dry hole

Dashed lines representing outcrops, faults, and contours indicate uncertainty
