

EXPLANATION

Approximate boundary of alluvium

Outcrop of top of Panther Creek limestone

Faults

U, upthrust; D, downthrust

Structure contours

(Drawn from surface observations to show structure of a theoretical bed 542 feet below the top of the Revard sandstone. Figures show elevation above sea level in feet. Contour interval 10 feet)

Dashed lines represent approximate location; dotted lines, rocks concealed by alluvium; hachured lines, closed depressions
