

UNITED STATES DEPARTMENT OF THE INTERIOR

Harold L. Ickes, Secretary

GEOLOGICAL SURVEY

W. C. Mendenhall, Director

Bulletin 860

GEOLOGY AND FUEL RESOURCES
OF THE
SOUTHERN PART OF THE SAN JUAN BASIN
NEW MEXICO

BY

JULIAN D. SEARS, CHARLES B. HUNT, AND CARLE H. DANE

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON : 1936

CONTENTS

	Page
The coal field from Gallup eastward toward Mount Taylor, by Julian D. Sears.....	1
The Mount Taylor coal field, by Charles B. Hunt.....	31
The La Ventana-Chacra Mesa coal field, by Carle H. Dane.....	81
Index.....	163

ILLUSTRATIONS

PLATE 1. Geologic map of the coal field eastward from Gallup, in the southern part of the San Juan Basin, N. Mex.....	In pocket
2. Index map showing location of the areas described in this and related reports.....	4
3-6. Views of the measured section of pre-Dakota(?) rocks near Navajo Church.....	12
7. Lower members of the Mesaverde formation in the eastern part of the Gallup coal district as named in Bulletin 767.....	12
8. A, Fault in sec. 35, T. 16 N., R. 12 W.; B, Gibson coal member of Mesaverde formation in T. 17 N., R. 17 W.....	12
9. A, West side of south end of Dalton Pass; B, West side of north end of Satan Pass.....	12
10. Map showing structure of the New Mexico portion of the San Juan Basin.....	20
11-17. Columnar sections showing coal beds of the Mesaverde formation in the southwestern part of the San Juan Basin.....	In pocket
18. Geologic map of the western part of the Mount Taylor coal field.....	In pocket
19. Geologic map of the eastern part of the Mount Taylor coal field.....	In pocket
20. Index map showing location of the areas described in this and related reports.....	32
21. View showing intertonguing relations of Mancos and Mesaverde formations.....	40
22. View on Lagunitas grant from the volcanic neck 3 miles north of Sleeping Hound Butte.....	40
23. A, Mancos shale resting unconformably on white sandstone of the Morrison formation in sec. 35, T. 15 N., R. 1 W.; B, View looking south along the San Ignacio monocline, in sec. 13, T. 15 N., R. 1 W.....	40
24. Mancos shale faulted down against sandstone no. 3 in lower Mancos, Sedillo grant, 2 miles northeast of Suwanee.....	40

	Page
PLATE 25. View looking north along the Ojito fault, T. 11 N., R. 2 W.---	48
26. <i>A</i> , Typical exposure of the Dilco coal member of the Mesa-verde formation, Sedillo grant; <i>B</i> , View looking southwest along the Ojo Escondido fault, Sedillo grant; <i>C</i> , Mulatto tongue of Mancos shale resting directly on Gallup sandstone, T. 12 N., R. 1 W.-----	48
27. Generalized structure map of the New Mexico portion of the San Juan Basin.-----	56
28. Columnar sections showing coal beds in the Dilco coal member.-----	In pocket
29-33. Columnar sections showing coal beds in the lower part of the Gibson coal member.-----	In pocket
34-37. Columnar sections showing coal beds in the upper part of the Gibson coal member.-----	In pocket
38. Columnar sections showing coal beds in the Gibson coal member.-----	In pocket
39. Geologic map of the La Ventana-Chacra Mesa coal field in the southern part of the San Juan Basin, N. Mex.-----	In pocket
40. Index map showing the location of the areas described in this and related reports.-----	82
41. Correlation and thickness of the formations exposed in the La Ventana-Chacra Mesa coal field.-----	90
42. <i>A</i> , Mancos shale and overlying Hosta sandstone member of Mesaverde formation; <i>B</i> , Exposures of the Mesaverde formation near La Ventana.-----	98
43. <i>A</i> , Banded barren shales of the Allison member of the Mesaverde formation in sec. 11, T. 18 N., R. 2 W.; <i>B</i> , Bedded sandstones of the Chacra sandstone member of the Mesaverde formation resting on the more irregularly bedded shales and sandstones of the Allison member in sec. 29, T. 18 N., R. 4 W.-----	98
44. <i>A</i> , The escarpment of the south front of Chacra Mesa; <i>B</i> , View looking east across Torreones Arroyo from the NW¼ sec. 15, T. 18 N., R. 4 W.-----	98
45. <i>A</i> , Erosional irregularity at the base of a sandstone near the top of the Chacra sandstone member of the Mesaverde formation; <i>B</i> , Small fault cutting the top of the Allison member of the Mesaverde formation but not disturbing the basal bed of the Chacra sandstone member, in the SE¼ sec. 14, T. 18 N., R. 6 W.-----	98
46. <i>A</i> , Normal fault dropping Pictured Cliffs sandstone and Lewis shale against the top of the Chacra sandstone member of the Mesaverde formation in the NW¼ sec. 6, T. 18 N., R. 6 W.; <i>B</i> , Pictured Cliffs sandstone and Fruitland formation in sec. 6, T. 21 N., R. 9 W.-----	114
47. <i>A</i> , View looking southeast from Ojo Alamo sandstone escarpment in the NW¼ sec. 16, T. 20 N., R. 6 W., toward badlands in the Kirtland shale; <i>B</i> , Escarpment of Ojo Alamo sandstone with Kirtland shale below it near Ojo Aguila.---	114
48. <i>A</i> , Banded clay of the Torrejon formation in T. 21 N., R. 5 W.; <i>B</i> , Cliff of conglomerate and sandstone of the Wasatch formation in the NW¼ sec. 27, T. 21 N., R. 5 W.-----	122
49. Map showing the structure of the New Mexico portion of the San Juan Basin.-----	130

	Page
PLATE 50. <i>A</i> , Normal fault dropping sandstone beds of the Mesaverde formation to the east, as seen from the SE¼ sec. 36, T. 19 N., R. 2 W.; <i>B</i> , Mesaverde formation in the SE¼ sec. 35, T. 21 N., R. 1 W.....	130
51. <i>A</i> , Plug of dark igneous rock in the NE¼ sec. 29, T. 18 N., R. 4 W.; <i>B</i> , Xenolith of white sandstone and red shale and other smaller xenoliths in dark igneous rock.....	130
52. <i>A</i> , Thin dike of dark igneous rock cutting sandstone and shale of the Allison member in the NW¼ sec. 32, T. 18 N., R. 4 W.; <i>B</i> , Tipple of the Cleary mine of the San Juan Coal & Coke Co., in the SW¼ sec. 31, T. 19 N., R. 1 W.....	130
53. Columnar sections showing coal beds in the Fruitland and Mesaverde formations.....	In pocket
54. Columnar sections showing coal beds in the Mesaverde formation.....	In pocket
55. Columnar sections showing coal beds in the Gibson coal member of the Mesaverde formation.....	In pocket
FIGURE 1. Diagrammatic section illustrating the intertonguing relations of the Mancos and Mesaverde formations east of Mesa Chivato.....	42
2. View looking northeast across the San Ignacio monocline in sec. 3, T. 11 N., R. 3 W.....	65
3. Cross section showing relations of coal beds between localities 127 and 129, in the southeastern part of T. 18 N., R. 2 W..	137
