MINERAL RESOURCES OF ALASKA

REPORT ON PROGRESS OF INVESTIGATIONS IN 1934

BY PHILIP S. SMITH AND OTHERS

UNITED STATES DEPARTMENT OF THE INTERIOR
Harold L. Ickes, Secretary
GEODESY AND GEODETICS
W. C. Mendenhall, Director.

Bulletin 868

UNITED STATES GOVERNMENT PRINTING OFFICE
WASHINGTON: 1937
CONTENTS

[The letters in parentheses preceding the titles are those used to designate the papers for separate publication]

(A) Mineral industry of Alaska in 1934, by P. S. Smith (published Jan. 25, 1936)................................. 1
(B) Kodiak and vicinity, by S. R. Capps (published —, 1937)................................................................. 93
(C) Upper Copper and Tanana Rivers, by F. H. Moffit (published Dec. 9, 1936)................................. 135
(D) The Kaiyuh Hills, by J. B. Mertie, Jr. (published Feb. 15, 1937)......................................................... 145

Selected list of Geological Survey publications on Alaska................................................................. 1a

ILLUSTRATIONS

Plate 1. Topographic map of Kodiak and vicinity, Alaska................................................................. 96
2. Geologic map of Kodiak and vicinity................................................................. 104
3. Geologic sketch map of northwestern part of Kodiak Island................................................................. 104
4. A, Graywacke beds near Crag Point, Sharatin Bay; B, Heavy alder brush at head of west arm of Ugak Bay................................................................. 112
5. A, Contorted slates near Shakmanof Point; B, Concretionary Mesozoic graywacke, Sharatin Bay................................................................. 113
6. A, Miocene sandstone at Narrow Point; B, Postglacial gulches on south side of upper Ugak Bay................................................................. 128
7. Kodiak, Alaska, in August 1912, several months after the explosion of Katmai Volcano................................................................. 129
8. Sketch map of a part of the upper Copper River and Tanana River Basins................................................................. 136
9. Geologic sketch map of the Kaiyuh Hills and part of the Ruby district................................................................. 158

Figure 1. Trends of mineral production of Alaska, 1890–1934................................................................. 8
2. Trend of value of gold production of Alaska, 1880–1934................................................................. 12
3. Copper produced from Alaska mines, 1900–1934, and fluctuations in the price of copper during that period................................................................. 66
4. Index map showing location of Kodiak Island................................................................. 94
5. Areas on Kodiak Island in which timber occurs................................................................. 102
6. Index map showing location of the Kaiyuh Hills................................................................. 146
