

Table 7. SST estimates for ODP Hole 1020D. Dashes (-) indicate unreliable SST estimates; \* insufficient information to calculate standard deviations; n = number of coretop sample matches with  $SCD \leq 0.15$ .

Sample	Depth <sup>a</sup> (rmcd)	age <sup>b</sup> (kyr)	n	SST <sub>cold</sub> (°C)	SST <sub>warm</sub> (°C)	2 $\sigma$ <sub>cold</sub> (°C)	2 $\sigma$ <sub>warm</sub> (°C)
1020D 2H-1,102	12.82	97.925	9	7.03	12.33	2.51	2.63
