

Table 8-1. Sedimentary rock-hosted Au-Ag training sites in northern Nevada

Listed by Class: Deposit identification/ location from Davis and Tingley (1999). Deposit, mine, district: deposit is name of training site; some districts have multiple deposits in a single mine. Class: see text for explanation of types. Deposit type: specific characteristic or variant on Class. S&S: Intersection: unit shown on Nevada state geologic map (Stewart and Carlson, 1978) with which training site intersects. Actual Host: actual host of deposit. Company: mining company using Nevada state geologic map (Stewart and Carlson, 1978). Host unit name: name of unit in which deposit occurs, based on local data. Usage: mining company controlling deposit and date of last information. Location information: County, township, range, latitude, longitude, UTM/Easting (UTM/E), UTMN (UTM North). UTM: Geological Survey topographic map that contains deposit. Assessment: type of tract in which deposit occurs (see text and fig. 8-31).

Leaseholder	Mine	District	Class	Deposit type	S&C Inter-section	Actual	Host Unit Name	Company	Major Com-munity	Other Com-munity	County	Latitude	Longitude	UTME	UTM	Topographic map	Assessment
