

EXPLANATION

- hw Hanging-wall strata (Graywacke and magnetic slate)
- Iron-formation (Mostly interbedded chert and siderite. Locally oxidized)
- fw Footwall strata (Graphitic slate and gray slate)
- gs Greenstone (Altered basic volcanic rocks)
- Outcrop (Bedded and non-bedded rock)
- Inferred geologic boundary
- Inferred fault
- DELPHIC Mine shaft
- Test pit
- Drill hole

Magnetic data, outcrop descriptions, test pit and drill hole descriptions shown on Plate 2
