INTRODUCTION

Many U. S. Geological Survey Trace Elements¹ and related reports have been made available to the public, either by open-file release, reproduction and distribution by the Technical Information Service

¹ Reports prepared by the Geologic Division of the Geological Survey on behalf of the Division of Raw Materials and the Division of Research of the U. S. Atomic Energy Commission. (TEI-Trace Elements Investigations Report; TEM-Trace Elements Memorandum Report; reports with no TE designation are not numbered into the Trace Elements Reports series.)

(referred to as TIS) of the U. S. Atomic Energy Commission, or publication by the Geological Survey or in a scientific journal.

The following list has been compiled as a reference guide to Geological Survey reports on radioactive raw materials that have been made available to the public, through May 31, 1953. These reports are listed according to the type of publication or release.

REPORTS RELEASED IN OPEN FILE

The reports released in open file are listed alphabetically by author and chronologically when there is more than one report by the same author. The reports may be consulted at the Geological Survey Library, Room 1033, General Services Administration Building, Washington, D. C., and at various depositories, whose addresses are indicated after the date of open file, either by symbol or complete address. Symbols are used for the following depositories:

TRACE ELEMENTS REPORTS ISSUED BY THE TECHNICAL INFORMATION SERVICE, U. S. ATOMIC ENERGY COMMISSION, OAK RIDGE, TENN.

Trace Elements reports that have been issued by the Technical Information Service (referred to as TIS) are listed by Trace Elements Investigations and Trace Elements Memorandum Report numbers. The asterisk indicates that the report has been sent to TIS for reproduction but has not been issued. If TIS issued a Trace Elements report under a different number, the TIS number is given after the title, i. e., TEI-23 was issued as AECD-1815 (Atomic Energy Commission Declassified). The year listed is the date shown on the copy of the TIS issue.
