

EXPLANATION

- Alluvium
- Basic rocks
Occurs as dikes
- Syenite(?)
- Pegmatite and white granite
- Microcline granite
- Undifferentiated granitic rocks
Mostly migmatite and some biotite granite gneiss
- Metagabbro
- Biotite granite gneiss
- Amphibolite
- Contact
Dashed where approximately located
- Indefinite contact
- Limit of exposure
- Fault and shear zone, showing dip
Dashed where approximately located
- Concealed fault
- Strike and dip of foliation
- Strike of vertical foliation
- Vertical shaft
- Prospect pit and dump
- Portal and open cut with dump
- LD-8
Sample number and location
- Fence
