INTRODUCTION

This circular contains a list of the maps and reports released by the Geological Survey in 1953 that are available only in open files. They may be consulted in the Geological Survey Library in Washington, D. C., and at various field offices, the addresses of which are given immediately after the date of the report. They may also be read at the offices of various cooperating agencies, as indicated.

Most of the maps were duplicated by rapid and inexpensive processes, such as photostat, vandyke, or ozalid, but some were printed by photolithography. Most of the texts for the reports are typed copies (ribbon or carbon copy), but some have been mimeographed. A few of these reports and maps were made available in limited quantities for distribution, as indicated in the list, and these may be obtained as long as the supply lasts.

The report and maps of the Conservation Division concern the topography of federally owned or controlled lands as it affects the production of water power;

it covers areas studied or mapped by geologists and engineers in one State.

The reports and maps of the Geologic Division contain results of work accomplished by Survey geologists in 36 States, Alaska, Puerto Rico, and Greenland. These maps and reports are released in preliminary form in order to make information immediately available to property owners and mine operators concerned with exploration for and production of minerals, fuels, and construction materials.

The reports of the Water Resources Division contain information on streamflow, ground water, quality of water, and related geology and hydrology in the United States, Alaska, the Virgin Islands, Cuba, and Saudi Arabia.

A general index follows, in which the reader is referred to a report by its serial number as listed in the following list of reports, which are arranged alphabetically by names of the authors.

MAPS AND REPORTS

1. Albers, J. P., and Robertson, J. F., East Shasta copper-zinc district, Shasta County, Calif.: 1 map. Sept. 16, 1953. 102 Old Mint Bldg., San Francisco, Calif.; California Division of Mines, Ferry Bldg., San Francisco, Calif.
