Part 7.—Lower Mississippi River Basin

By H. P. Eisenhuth

INTRODUCTION

This report lists the streamflow and reservoir stations in the Lower Mississippi River basin for which records have been or are to be published in reports of the Geological Survey for periods through December 31, 1963. It supersedes Geological Survey Circular 387.

Basic data on surface-water supply have been published in an annual series of water-supply papers consisting of several volumes, including one each for the States of Alaska and Hawaii. The area of the other 48 States is divided into 14 parts whose boundaries coincide with certain natural drainage lines. Prior to 1951, the records for the 48 States were published in 14 volumes, one for each of the parts. From 1951 to 1960, the records for the 48 States were published annually in 18 volumes, there being 2 volumes each for Parts 1, 2, 3, and 6. The boundaries of the various parts are shown on the map in figure 1.

Beginning in 1961, the annual series of water-supply papers on surface-water supply was changed to a 5-year series. Records for the period 1961-65 will be published in a series of water-supply papers using the same 14 part divisions for the 48 States, but most parts will be further subdivided into two or more volumes. In order to meet interim requirements, beginning in 1961, local offices issue reports annually containing streamflow records for the State or States within the local district.

In addition to the continuous-record gaging stations, this index includes crest-stage and low-flow partial-record stations. A continuous-record station is a gaging station on a stream or reservoir for which the discharge, stage, or contents is published on a daily, weekly, or monthly basis for a continuous period of time. A crest-stage partial-record station is a streamflow station for which only the annual maximum discharge is published over a period of years for use in floodflow analyses. A low-flow partial-record station is a streamflow station for which only discharge measurements made at base flow, when streamflow is primarily from ground-water storage, are published. Measurements are generally collected over a period of five years or more for use in low-flow analyses. Discharge measurements have been made at many sites and published as miscellaneous measurements. Such measurements are not included in this index except those made in earlier years at sites now classified as low-flow partial-record stations.

An alphabetical list of streams, lakes, and reservoirs is given on pages 47-55.

DOWNSTREAM ORDER

The stations in this index are listed in the downstream order used in the series of water-supply papers on surface-water supply of the United States since 1951. Starting at the headwater of each stream, all stations are listed in a downstream direction. Tributary streams are indicated by indentation and are inserted between main-stem stations in the order in which they enter the main stream. To indicate the rank of any tributary on which a record is available and the stream to which it is immediately tributary, each indentation in the listing of stations represents one rank. A stream name, only, is inserted where necessary for the purpose of showing the proper rank or order of tributaries.

STATION NAMES

Station names are given in their most recently published form. Parentheses around part of a station name indicate that the enclosed word or words were used in an earlier published name of the station or as an alternate name. Parenthetical explanations are also used to indicate that a stream of a different name is the head of the main stream by use of "(head of _____ River)" and that the name of the main stream has changed by use of "(continuation of _____ River)."

STATION NUMBER

As an added means of identification, each continuous- and partial-record station has been assigned a station number. The numbers have been assigned in the same downstream order used in this index. In assigning station numbers, gaps were left to allow for new stations that may be established; hence the numbers are not consecutive. The complete number for each station includes the part number, which is omitted in this index. The number given consists of only the essential digits of the complete number. For example, for a station with the complete number 07-0145.00, the station number shown in this index is 145.

DRAINAGE AREA

The drainage area, in square miles, is the latest figure published or otherwise available at this time.

PERIODS OF RECORD

Under "Periods of record" are three columns. The first column, "Daily or monthly figures," shows the periods of record for continuous-record gaging stations. The dates given are the calendar years in which records began or ended; breaks of less than a year are not shown. For example, if a record began in October 1923, ended in April 1932, began again in March 1933, and ended in September 1944, the period of record would be shown as 1923-44.

The second column, "Annual peaks," shows the period of record for crest-stage partial-record stations. The dates given are the water years for which the annual maximum discharge is available. The water year begins October 1 and ends September 30. In listing the water year, only one date is shown; for example, 1952 stands for the water year October 1, 1951, to September 30, 1952.

The third column, "Low-flow measurements," shows the period of record for low-flow partial-record stations. The dates given are the water years in which base-flow measurements were made at low-flow partial-record stations; breaks of less than two years are not shown. Prior to the 1958 water year, such measurements were published in tables headed "Miscellaneous discharge measurements" or "Discharge measurements at sites other than gaging stations." Many discharge measurements have been made at miscellaneous sites which are not listed in this index because the data collected were not sufficient to qualify the site as a low-flow partial-record station.

A date followed by only a dash shows that the station was continued in operation beyond December 31, 1963. A date followed by a period indicates discontinuance. A date followed by a semicolon indicates a break in the collection of records.

Periods of record for the same continuous-record station published by other agencies are listed only when they are for periods not published in reports of the Geological Survey. These periods are indicated by symbols and footnotes. Records collected by other agencies are included only for stations for which there is some record published in Geological Survey reports.

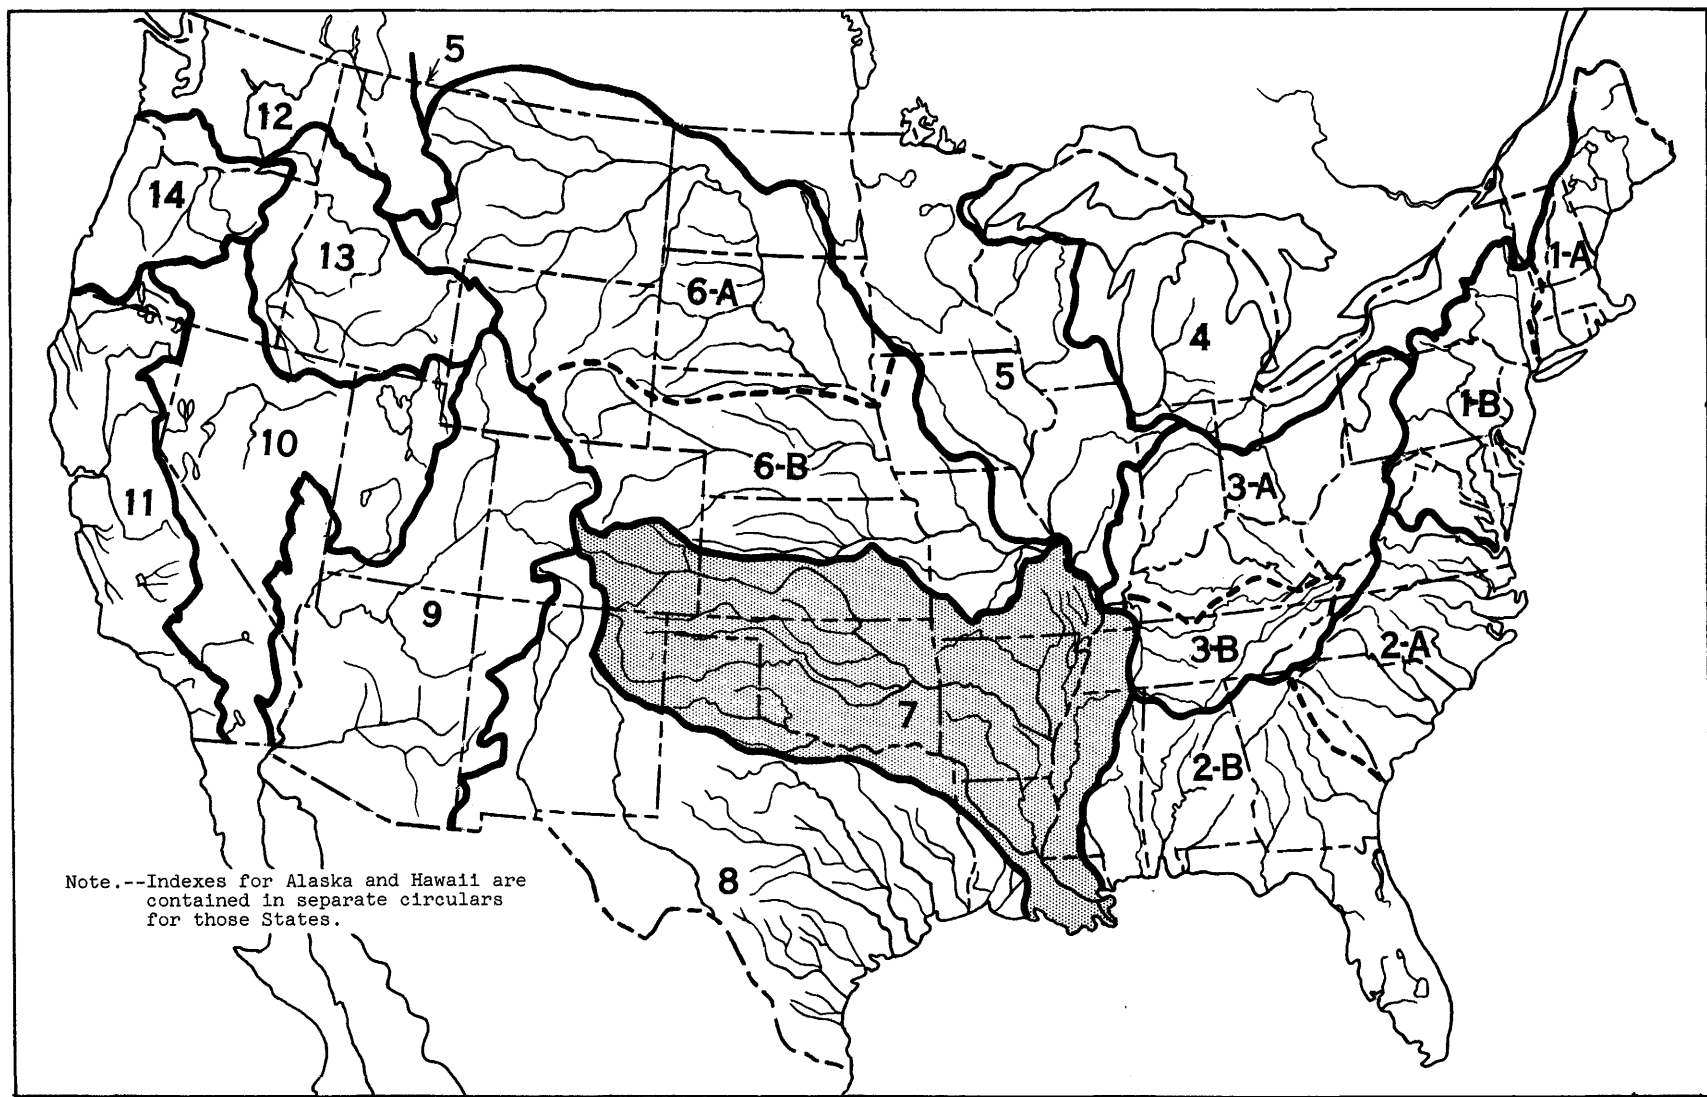

Figure 1.--Map of the conterminous United States showing the 14 parts covered by indexes of surface-water records to December 31, 1963. The part covered by this index is shaded. 6

Station name	Station number	Drainage area (sq mi)	Periods of record		
			Daily or monthly figures	Annual peaks	Low-flow measurements
Mississippi River at St. Louis, Mo.....	7-100	a701,000	1861-

Meramec River near Eureka, Mo.....	190	3,788	1903-6;1921-		
Meramec River (Station No.1) at Fenton, Mo.....	190.2	-	1903*.		
Meramec River (Station No.2) below Fenton, Mo.....	190.4	-	1903*.		
Joachim Creek basin					
Joachim Creek at Hematite, Mo.....	190.5	-	1961-
Plattin Creek basin					
Plattin Creek:					
Murphy Branch near Crystal City, Mo.....	191	.45	1955-	

<u>Saline Creek basin</u>					
Saline Creek near St. Marys, Mo.....	203	-	1964-
Mississippi River at Chester, Ill.....	205	a712,600	1873-*d;1891-*b;1927-	
<u>Apple Creek basin</u>					
Apple Creek at Appleton, Mo.....	206	-	1961-
Indian Creek:					
Hoehs Branch near Uniontown, Mo.....	207	1.66	1955-	
<u>Headwater diversion channel basin</u>					
Castor River (head of headwater diversion channel) at Zalma, Mo.....	210	423	1920-		
Crooked Creek at Lutesville, Mo.....	211.5	-	1961-
Sunnybrook Creek at Lutesville, Mo.....	212	.52	1955-	
Crooked Creek near Whitewater, Mo.....	213	-	1962-64.
Whitewater River at Millersville, Mo.....	214	-	1961-
Whitewater River at Whitewater, Mo.....	216	326	1921-26*.....	1961-
Headwater diversion channel at Allenville, Mo.....	218	-	1960-
Mississippi River at Thebes, Ill. (Cape Girardeau, Mo.).	220	a717,200	1879-*d;(1891-94;1904-)*b; 1932-		
<u>Mayfield Creek basin</u>					
Mayfield Creek:					
Perry Creek near Mayfield, Ky.....	225	1.72	1952-		
Mayfield Creek at Lovelaceville, Ky.....	230	212	1938-		
<u>Obion Creek basin</u>					
Obion Creek at Pryorsburg, Ky.....	235	36.8	1951-		
<u>Bayou du Chien basin</u>					
Bayou du (de) Chien near Clinton, Ky.....	240	68.7	1939-		
<u>St. Johns Bayou basin</u>					
St. Johns Bayou:					
Main ditch lateral No.2 near East Prairie, Mo.....	241	97.3	1958-
St. James ditch at East Prairie, Mo.....	241.5	17.5	1958-
Maple Slough near East Prairie, Mo.....	241.7	24.5	1958-
<u>Obion River basin</u>					
South Fork Obion River:					
Guins Creek:					
Crooked Creek near Huntingdon, Tenn.....	242	26.5	1954;1958-
Guins Creek near Huntingdon, Tenn.....	242.5	43.5	1958-
Beaver Creek at Huntingdon, Tenn.....	243	55.5	1962-.....	1954-62.....	1946-48;1952-54; 1957-61. 1958-
Reedy Creek near Trezevant, Tenn.....	244	a57	
South Fork Obion River near Greenfield, Tenn.....	245	431	1929-		
Middle Fork Obion River near Como, Tenn.....	247	67.6	1958-60.
Rutherford Fork Obion River near Milan, Tenn.....	249	107	1958-61.
Rutherford Fork Obion River near Bradford, Tenn...	250	203	1929-57.		
Mud Creek near Sidonia, Tenn.....	252	73.8	1958-61.
Cane Creek near Martin, Tenn.....	252.2	6.79	1955-	
Cane Creek tributary near Martin, Tenn.....	252.25	.76	1955-	
North Fork Obion River at Jones Mill, Tenn.....	253	83.7	1958-61.
Cypress Creek near Latham, Tenn.....	253.5	36.7	1958-
North Fork Obion River near Union City, Tenn.....	255	480	1929-		
Obion River at Obion, Tenn.....	260	a1,880	1929-58.		
Richland Creek near Obion, Tenn.....	260.3	17.7	1958-
Reelfoot Creek near Samburg, Tenn.....	265	a110	1950-		
Pawpaw Creek at Push, Tenn.....	271	14.8	1958-62.
