Part 13.—Snake River Basin

By H. P. Eisenhuth

INTRODUCTION

This report lists the streamflow and reservoir stations in the Snake River basin for which records have been or are to be published in reports of the Geological Survey for periods through December 31, 1963. It supersedes Geological Survey Circular 393.

Basic data on surface-water supply have been published in an annual series of water-supply papers consisting of several volumes, including one each for the States of Alaska and Hawaii. The area of the other 48 States is divided into 14 parts whose boundaries coincide with certain natural drainage lines. Prior to 1951, the records for the 48 States were published in 14 volumes, one for each of the parts. From 1951 to 1960, the records for the 48 States were published annually in 18 volumes, there being 2 volumes each for Parts 1, 2, 3, and 6. The boundaries of the various parts are shown on the map in figure 1.

Beginning in 1961, the annual series of water-supply papers on surface-water supply was changed to a 5-year series. Records for the period 1961-65 will be published in a series of water-supply papers using the same 14 part divisions for the 48 States, but most parts will be further subdivided into two or more volumes. In order to meet interim requirements, beginning in 1961, local offices issue reports annually containing streamflow records for the State or States within the local district.

In addition to the continuous-record gaging stations, this index includes crest-stage and low-flow partial-record stations. A continuous-record station is a gaging station on a stream or reservoir for which the discharge, stage, or contents is published on a daily, weekly, or monthly basis for a continuous period of time. A crest-stage partial-record station is a streamflow station for which only the annual maximum discharge is published over a period of years for use in floodflow analyses. A low-flow partial-record station is a streamflow station for which only discharge measurements made at base flow, when streamflow is primarily from ground-water storage, are published. Measurements are generally collected over a period of five years or more for use in low-flow analyses. Discharge measurements have been made at many sites and published as miscellaneous measurements. Such measurements are not included in this index except those made in earlier years at sites now classified as low-flow partial-record stations.

An alphabetical list of streams, lakes, and reservoirs is given on pages 25-29.

DOWNSTREAM ORDER

The stations in this index are listed in the downstream order used in the series of water-supply papers on surface-water supply of the United States since 1951. Starting at the headwater of each stream, all stations are listed in a downstream direction. Tributary streams are indicated by indentation and are inserted between main-stem stations in the order in which they enter the main stream. To indicate the rank of a tributary on which a record is available and the stream to which it is immediately tributary, each indentation in the listing of stations represents one rank. A stream name, only, is inserted where necessary for the purpose of showing the proper rank or order of tributaries.

STATION NAMES

Station names are given in their most recently published form. Parentheses around part of a station name indicate that the enclosed word or words were used in an earlier published name of the station or as an alternate name. Parenthetical explanations are also used to indicate that a stream of a different name is the head of the main stream by use of "(head of _____ River)" and that the name of the main stream has changed by use of "(continuation of _____ River)".

STATION NUMBER

As an added means of identification, each continuous- and partial-record station has been assigned a station number. The numbers have been assigned in the same downstream order used in this index. In assigning station numbers, gaps were left to allow for new stations that may be established; hence the numbers are not consecutive. The complete number for each station includes the part number, which is omitted in this index. The number given consists of only the essential digits of the complete number. For example, for a station with the complete number 13-0225.00, the station number shown in this index is 225.

DRAINAGE AREA

The drainage area, in square miles, is the latest figure published or otherwise available at this time.

PERIODS OF RECORD

Under "Periods of record" are three columns. The first column, "Daily or monthly figures," shows the periods of record for continuous-record gaging stations. The dates given are the calendar years in which records began or ended; breaks of less than a year are not shown. For example, if a record began in October 1923, ended in April 1932, began again in March 1933, and ended in September 1944, the period of record would be shown as 1923-44.

The second column, "Annual peaks," shows the period of record for crest-stage partial-record stations. The dates given are the water years for which the annual maximum discharge is available. The water year begins October 1 and ends September 30. In listing the water year, only one date is shown; for example, 1952 stands for the water year October 1, 1951, to September 30, 1952.

The third column, "Low-flow measurements," shows the period of record for low-flow partial-record stations. The dates given are the water years in which base-flow measurements were made at low-flow partial-record stations; breaks of less than two years are not shown. Prior to the 1958 water year, such measurements were published in tables headed "Miscellaneous discharge measurements" or "Discharge measurements at sites other than gaging stations." Many discharge measurements have been made at miscellaneous sites which are not listed in this index because the data collected were not sufficient to qualify the site as a low-flow partial-record station.

A date followed by only a dash shows that the station was continued in operation beyond December 31, 1963. A date followed by a period indicates discontinuance. A date followed by a semicolon indicates a break in the collection of records.

Periods of record for the same continuous-record station published by other agencies are listed only when they are for periods not published in reports of the Geological Survey. These periods are indicated by symbols and footnotes. Records collected by other agencies are included only for stations for which there is some record published in Geological Survey reports.

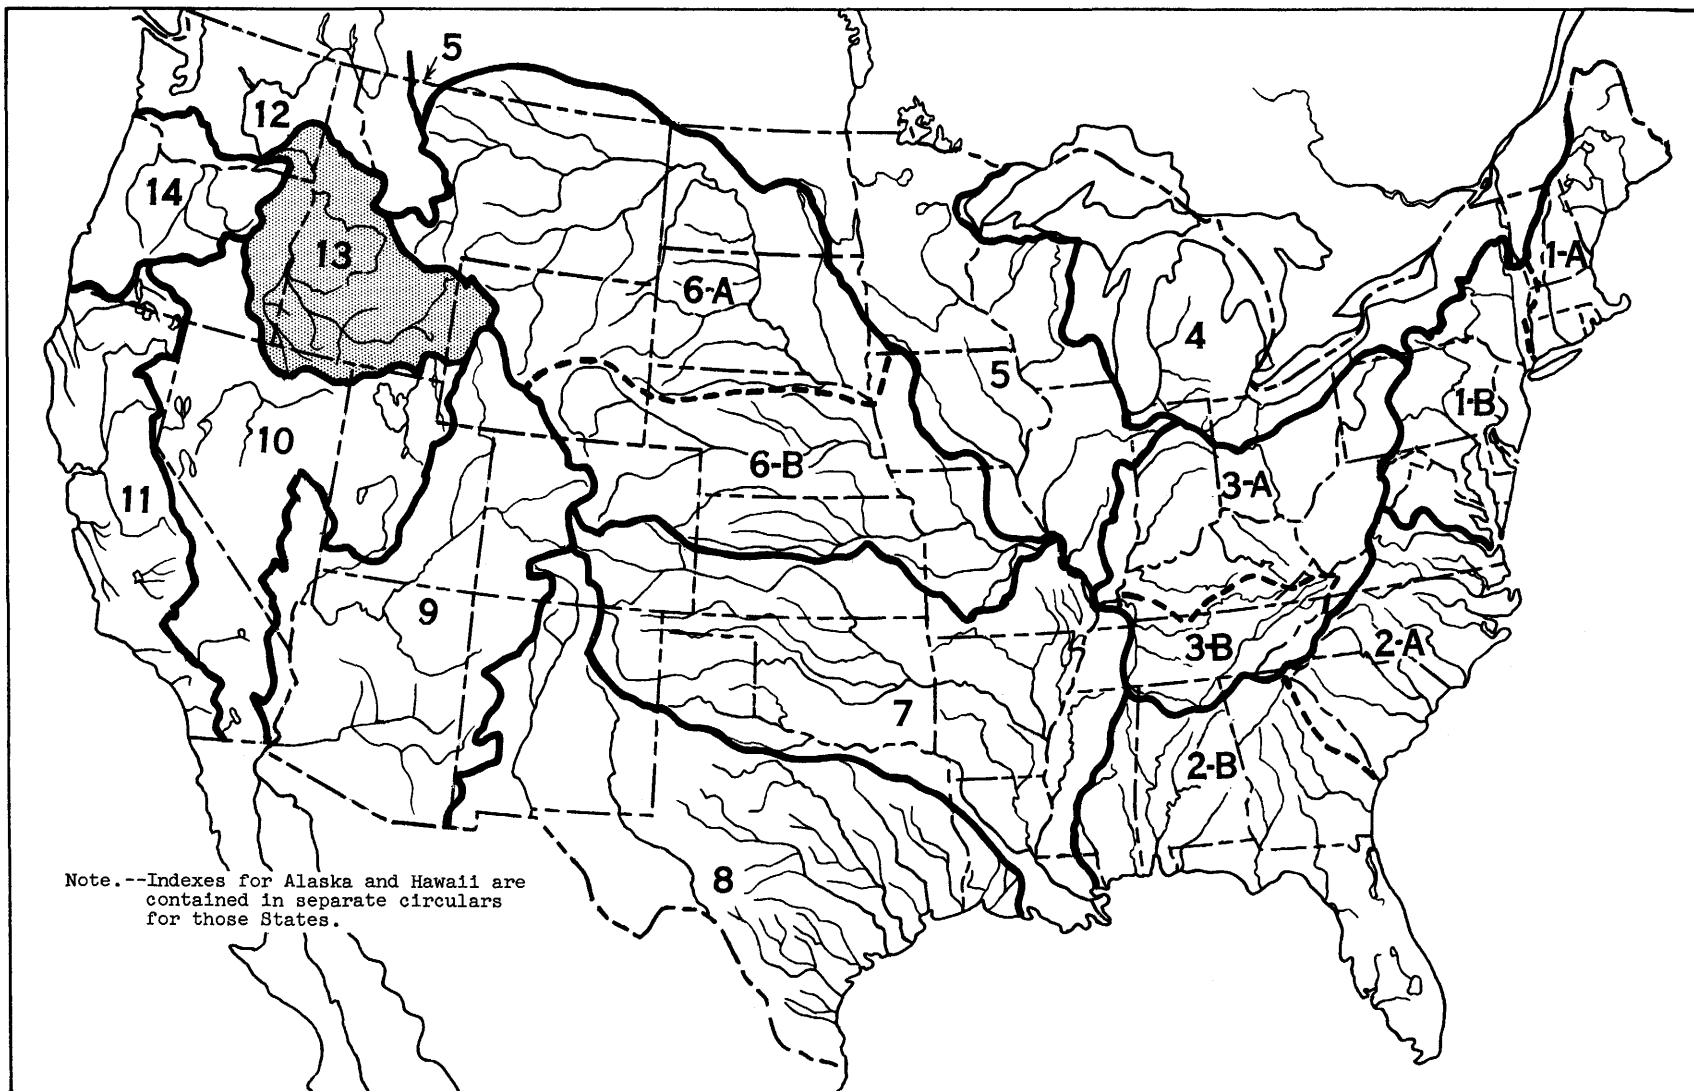

Figure 1.--Map of the conterminous United States showing the 14 parts covered by indexes of surface-water records to December 31, 1963. The part covered by this index is shaded.

Station name	Station number	Drainage area (sq mi)	Periods of record		
			Daily or monthly figures	Annual peaks	Low-flow measurements
<u>Snake River basin</u>	13-				
Snake River at south boundary of Yellowstone National Park.	100	485	1913-25.		
Jackson Lake at Moran, Wyo.....	105	824	1908-

Red Creek near Alpine, Wyo.....	225.5	3.88		1964-	
Cottonwood Creek near Alpine, Wyo.....	225.7	2.40		1964-	
<u>Greys River basin</u>					
Greys River above reservoir, near Alpine, Wyo. (near Alpine, Idaho).	230	451	1917-18;1937-39;1953-		
Snake River below Greys River, at Alpine, Idaho.....	235	3,940	1944-54.		
<u>Salt River basin</u>					
Salt River:					
Fish Creek near Smoot, Wyo.....	238	a3.6		1964-	
Salt River near Smoot, Wyo.....	240	47.8	1932-57.		
Cottonwood Creek near Smoot, Wyo.....	245	26.3	1932-57.		
Swift Creek near Afton, Wyo.....	250	27.4	1942-		
Crow Creek near Fairview, Wyo.....	255	a115	1946-49;1961-		

Stump Creek near Auburn, Wyo.....	260	103	1946-49.	
Salt River near Thayne, Wyo.....	265	570	1932-33;1961-	
Strawberry Creek near Bedford, Wyo.....	270	21.3	1932-43.	
Bear Canyon near Freedom, Wyo.....	272	a3.3		1961-
Salt River above reservoir, near Etna, Wyo.....	275	829	1953-	
Salt River near Alpine, Idaho.....	280	878	1917-18.	
Salt River at Wyoming-Idaho State line.....	285	890	1933-55.	
Snake River near (at) Alpine, Wyo. (Idaho).....	290	4,841	1916-18;1934.	
McCoy Creek basin				
McCoy Creek above reservoir, near Alpine, Idaho (near Alpine, Wyo.).	295	108	1917-18;1934;1953-61...	1962-
Indian Creek basin				
Indian Creek above reservoir, near Alpine (near Blowout), Idaho.	300	36.8	1917-18;1953-61.....	1962-
Elk Creek basin				
(Big) Elk Creek above reservoir, near Irwin (Blowout)	305	59.2	1917-18;1934;1953-61...	1962-
Little Elk Creek basin				
Little Elk Creek near Blowout, Idaho.....	310	11.4	1917.	
Snake River at Calamity Point, near Irwin, Idaho.....	315	5,124	1934-36;1939-41.	
Bear Creek basin				
Bear Creek above reservoir, near Irwin (near Irwin).	320	77.1	1917-18;1934-36;1953-	
Palisades Reservoir near Irwin, Idaho.....	324.5	5,208	1955-	
Snake River near Irwin, Idaho.....	325	5,225	1935-36;1949-	
Palisades Creek basin				
Palisades Creek:				
Palisades Canal near Irwin, Idaho.....	330	-	1935-36.	
Palisades Creek near Irwin, Idaho.....	335	60.8	1917-18;1934-36.	
Fall Creek basin				
Fall Creek near Swan Valley, Idaho.....	340	77.6	1917-18;1934-36.	
Rainy Creek basin				
Rainy Creek near (at) Swan Valley, Idaho.....	345	56.3	1917-18;1934-36.	
(South Fork) Snake River near Swan Valley (Lyon), Idaho	350	5,488	1903-11;1934.	
Pine Creek basin				
Pine Creek near Swan Valley, Idaho.....	355	63.2	1917-18;1934-36.	
Snake River at Dry Canyon, near Swan Valley, Idaho....	360	5,616	1934-36.	
Burns Creek basin				
Burns Creek near Chokecherry (Heise), Idaho.....	365	21.1	1917;1934-36.	
Snake River below Burns Creek, near Chokecherry, Idaho	370	5,659	1935.	
(South Fork) Snake River near Heise, Idaho.....	375	5,752	1910-	
Diversions between gaging stations near Heise and at Lorenzo				
Great Feeder Canal near Ririe, Idaho.....	380	-	1923-27.	
Snake River at Lorenzo, Idaho.....	385	5,810	1924-27.	
Henrys Fork basin				
Henrys Lake:				
Targhee Creek near Macks Inn, Idaho.....	389	a20		1963-
Henrys Lake near Lake, Idaho.....	390	a98	1923-	
Henrys Fork near Lake, Idaho.....	395	a98	1920-	
Henrys Fork near Big Springs, Idaho.....	400	166	1932.	
Big Springs Creek at Big Springs, Idaho.....	405	-	1924-25.	
Henrys Fork at Coffee Pot Rapids, near Island Park..	410	261	1935-40.	
Sheridan Creek near Island Park, Idaho.....	415	82.1	1935-40.	
Island Park Reservoir near Island Park, Idaho.....	420	481	1938-	
Henrys Fork near Island Park, Idaho.....	425	481	1933-	
Buffalo River near Island Park, Idaho.....	430	36.7	1935-41.	
Henrys Fork at De Winers Ranch, near Island Park....	435	523	1935-40.	
Henrys Fork (North Fork Snake River) at Warm River..	440	656	1910-15;1918-52.
