PREFACE

This bibliography and index contains about 200 reports and maps relating to coal published by the U.S. Geological Survey in the 3½-year period, January 1971 through June 1974. It is supplementary to Geological Survey Bulletin 1377 titled "Bibliography and Index of U.S. Geological Survey Publications Relating to Coal, 1882-1970."

The availability and price of reports and maps cited in this supplementary bibliography are given in the pamphlets and leaflets listed below:

1. A pamphlet titled "Publications of the Geological Survey," which is published annually.
2. A leaflet titled "New Publications of the Geological Survey," which is published monthly.
3. A circular titled "Reports and maps of the Geological Survey released only in the open files," which was published annually through 1973 and for early 1974. (Since May 1974 open-file reports and maps have been listed in the monthly "New Publications of the Geological Survey.")

These lists must be consulted to obtain information necessary to order a report. Copies of these lists are available free upon request addressed to the U.S. Geological Survey, Reston, Virginia 22092.

Most of the publications cited in this bibliography may be consulted in large public libraries and in most college and university libraries. A selected list of such libraries is given in Geological Survey Bulletin 1377, p. 161-173.
