WORLDWIDE DIRECTORY OF NATIONAL EARTH-SCIENCE AGENCIES AND RELATED MAJOR INTERNATIONAL ORGANIZATIONS

By WENONAH E. BERGQUIST, ELIZABETH J. TINSLEY, LAURA YORDY, and RALPH L. MILLER

INTRODUCTION

This edition of the "Worldwide Directory" has been prepared in response to continuing requests for up-to-date information on earth-science organizations. It provides addresses of governmental earth-science agencies around the world that have functions similar to those of one or more of the operating divisions of the U.S. Geological Survey (USGS); it also lists addresses of major international organizations that are concerned with some phase of the earth sciences. It has been considerably expanded since the 1978 edition (USGS Circular 771).

Most of the data presented herein are current as of November 1979; inevitably, some of the names and addresses given have changed since our survey, which was done during the summer and fall of 1979. Footnotes identify those countries for which we were unable to obtain recent accurate information from sources available to us. A large part of the information was supplied by staff members of American Embassies around the world, and a gratifying amount of data was provided by members of counterpart national organizations. We are indebted to all these officials, and to

all USGS colleagues and to others who have kindly assisted us by providing information.

The directory is arranged alphabetically by the name of the country. The location of each country is shown on a small index map, which is keyed to one of eight reference maps showing major regions of the world. The index maps should be helpful to the user in identifying countries that have adopted new names or that have recently attained independence.

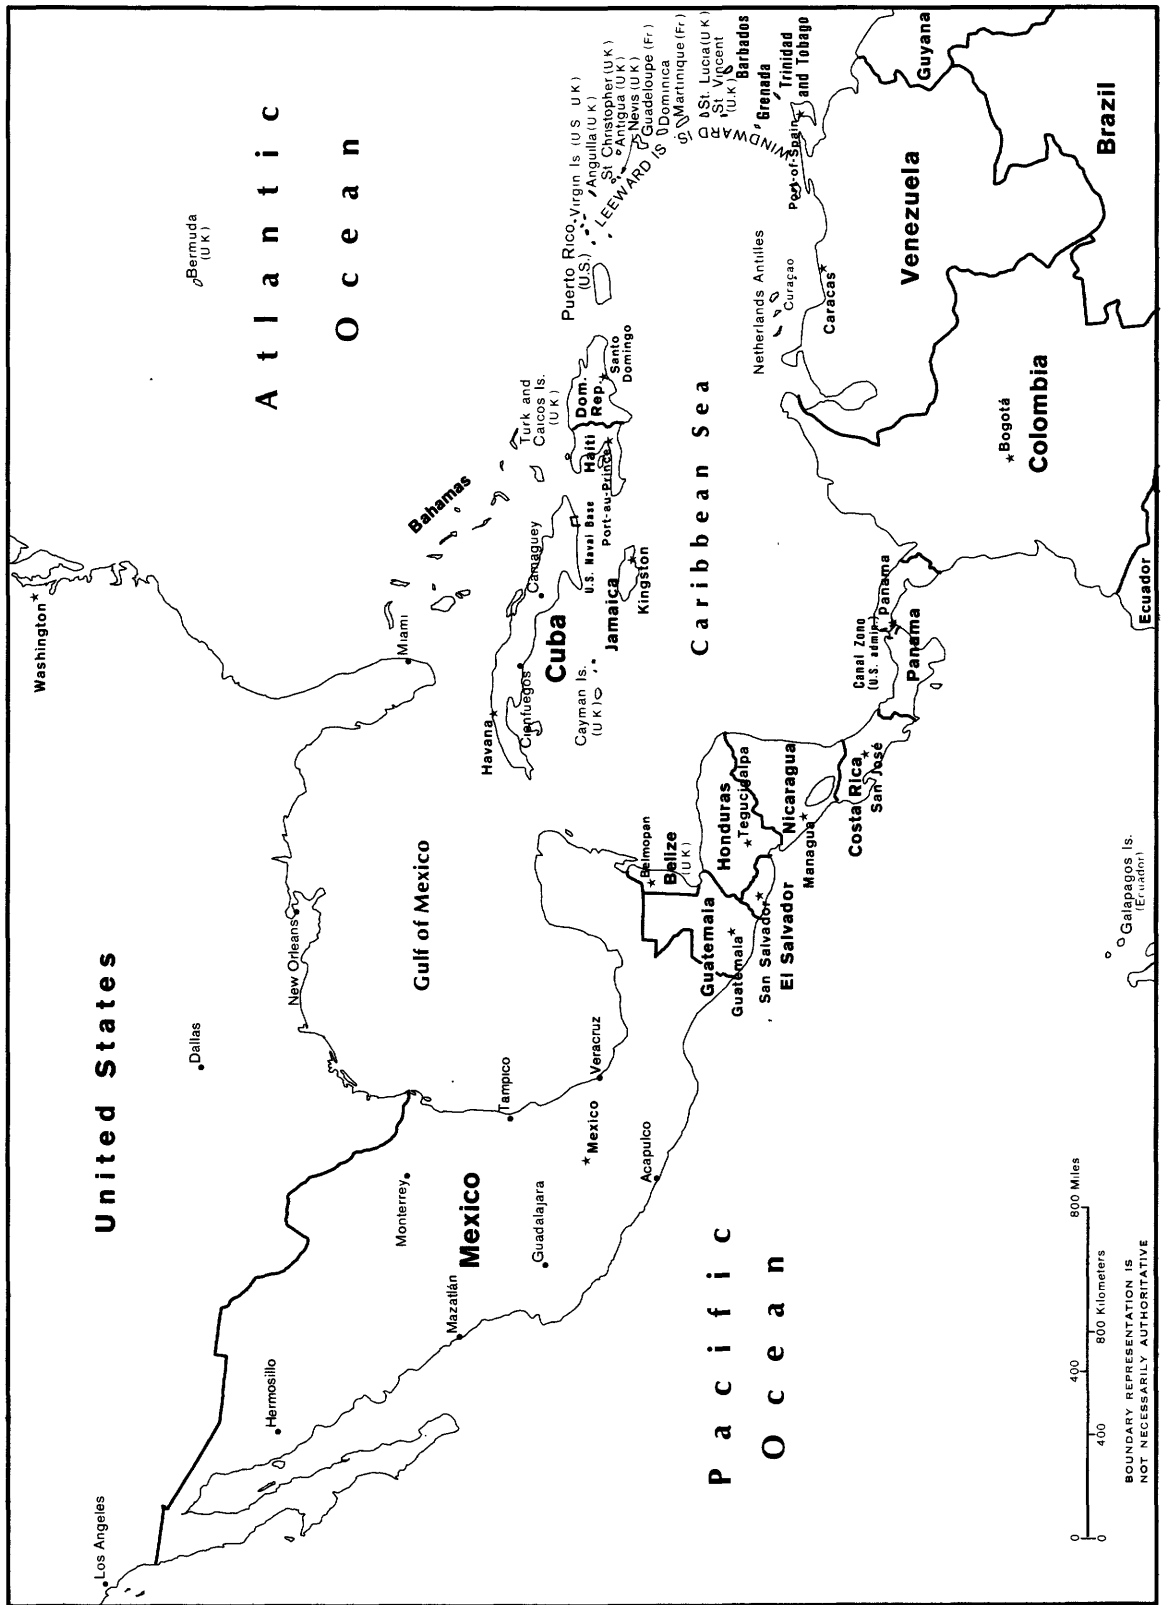

Wherever feasible, names of agencies in countries whose languages are based primarily on the Latin alphabet are given in the language of the country. English translations have been added in brackets where they seem necessary for easy understanding. Names of agencies in countries whose language is based on an alphabet other than Latin are given in English.

The principal functions of the USGS and of the agencies listed are indicated by code letters in the left margin of the column, as follows:

C = Cartography
G = Geology
H = Hydrology
R = Minerals and petroleum regulation

I. - North America

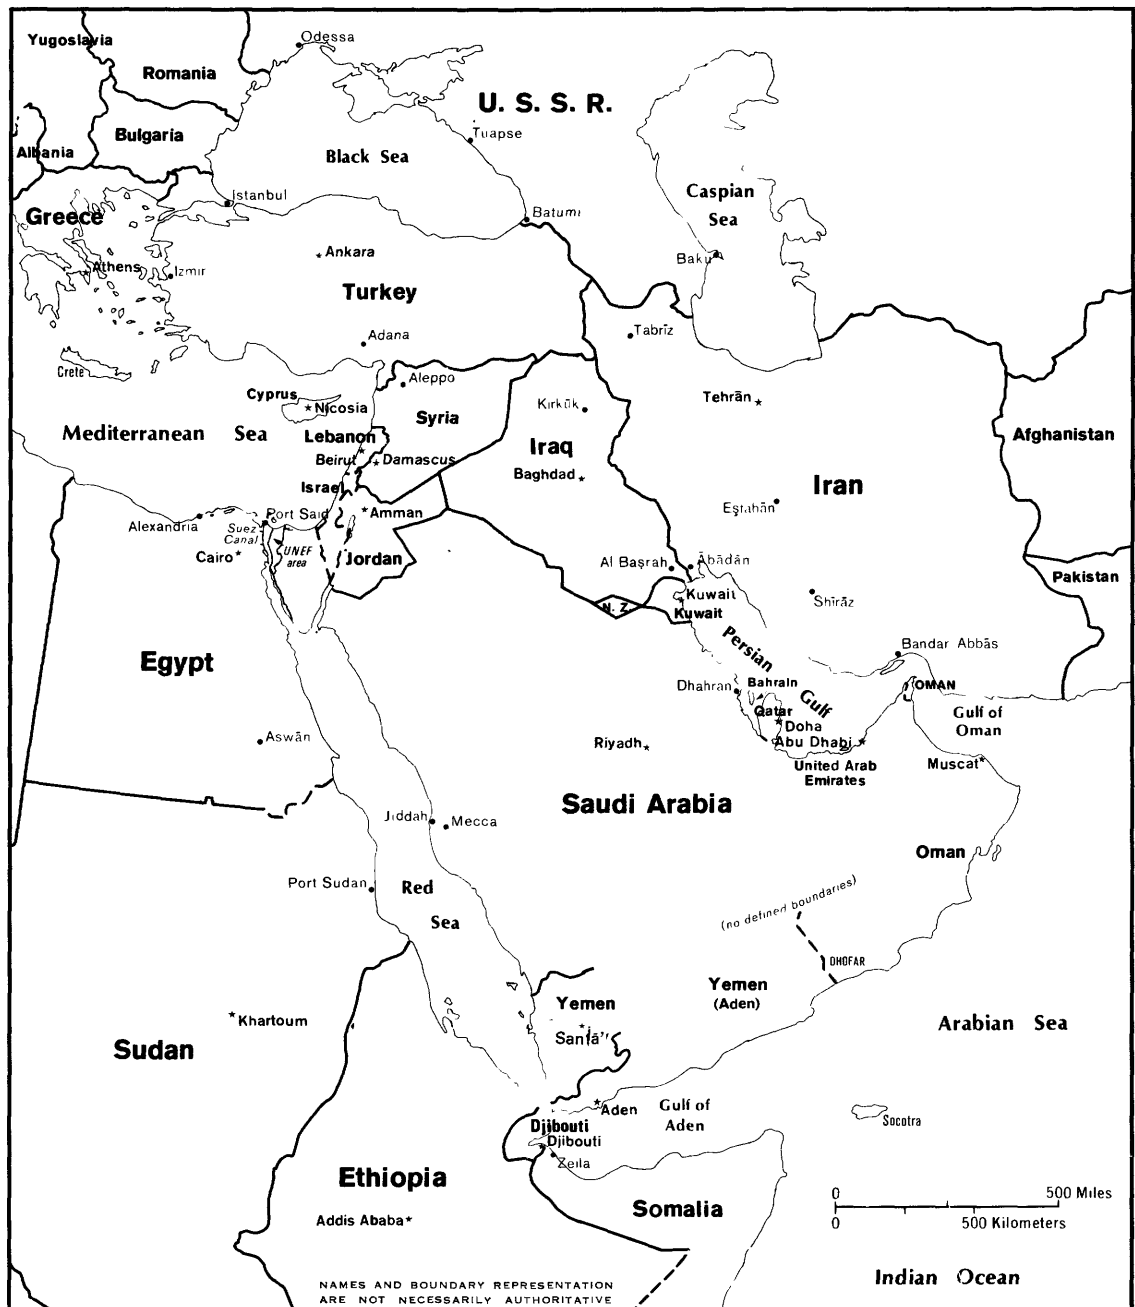

II.—Middle America

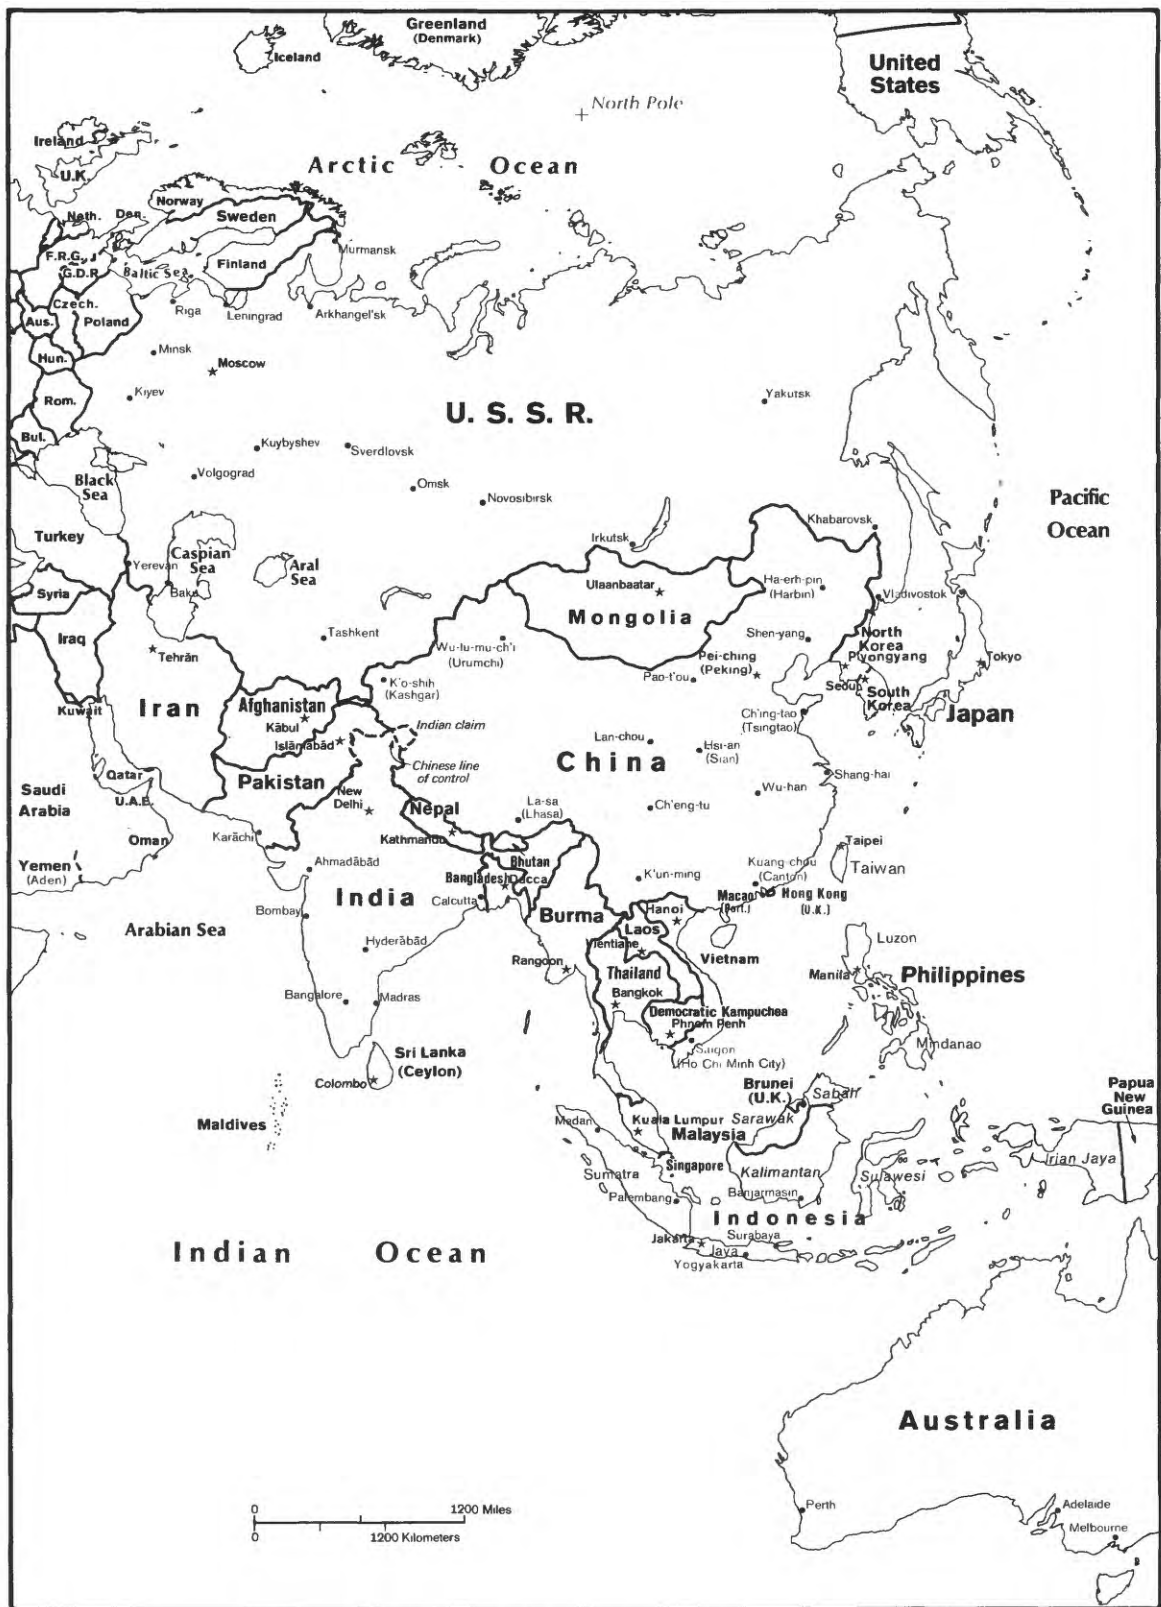

III. - South America

IV. - Europe

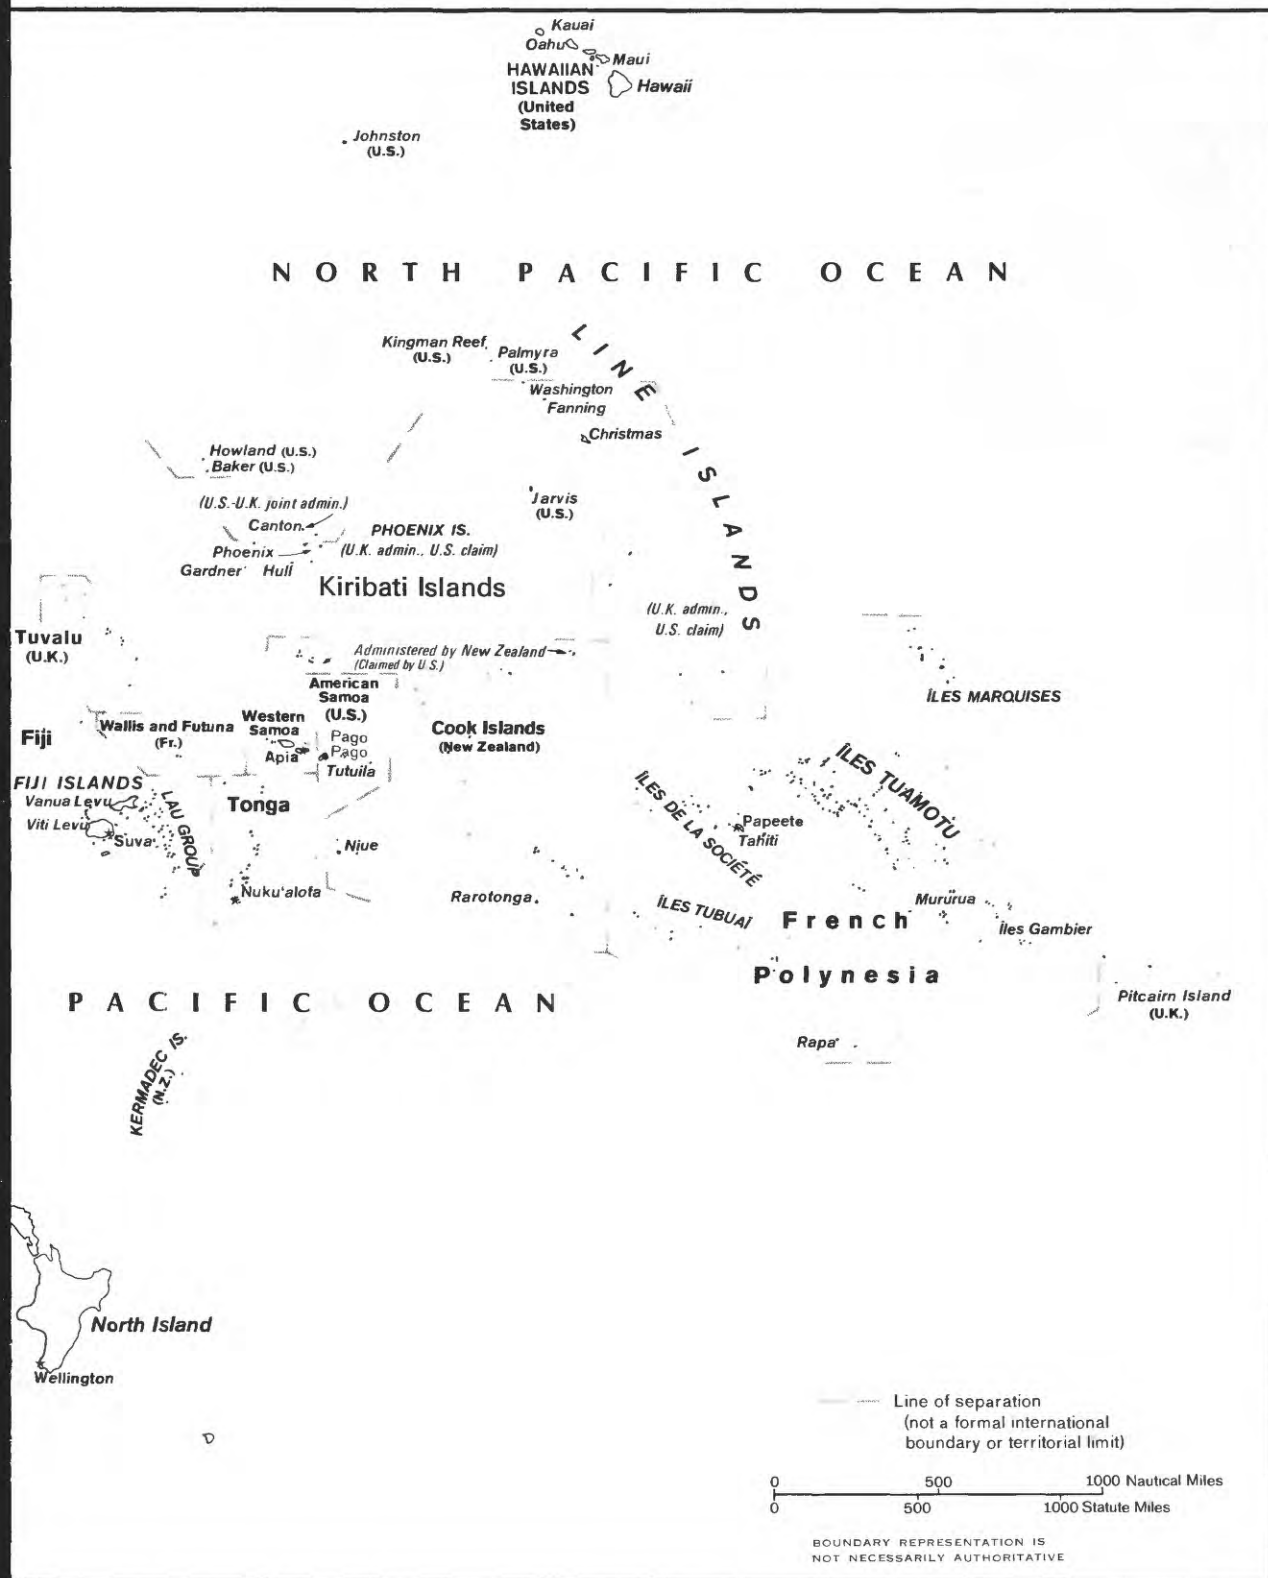

V.—The Middle East

VII.—U.S.S.R. and Asia

VIII.—Oceania

VIII. - Oceania
