

DEPARTMENT OF THE INTERIOR
UNITED STATES GEOLOGICAL SURVEY

Table 1.--Estimated coal resources, listed by township, in the Caballo Creek area, Campbell County, Wyoming.

[Estimates are not given for beds less than 2.5 feet thick. Estimates were made using the method proposed by Averitt (1969, p. 25-26). All overburden and coal bed thicknesses are in feet (to convert to meters, multiply by 0.3048); all resource estimates are in short tons (to convert to metric tonnes, multiply by 0.9072)]

Coal bed name, resource category, thickness	Overburden			
	0-50	50-100	100-200	200-1,000 >1,000
T. 46 N., R. 70 W.				
Measured	8,124	89,367		
Indicated	463,085	511,830		
T. 46 N., R. 71 W.				
Measured				
Indicated				
T. 47 N., R. 70 W.				
Measured	243,729	519,955		
Indicated	1,056,159	1,827,967		
T. 47 N., R. 71 W.				
Measured	619,071	82,867		
Indicated	3,178,226	492,332	243,729
