

**WESTERN MASSACHUSETTS BAY  
LONG-TERM MONITORING  
SITE A (1989- 1994)**

**USCG BOSTON APPROACH  
LARGE NAVIGATION BUOY (LNB)**

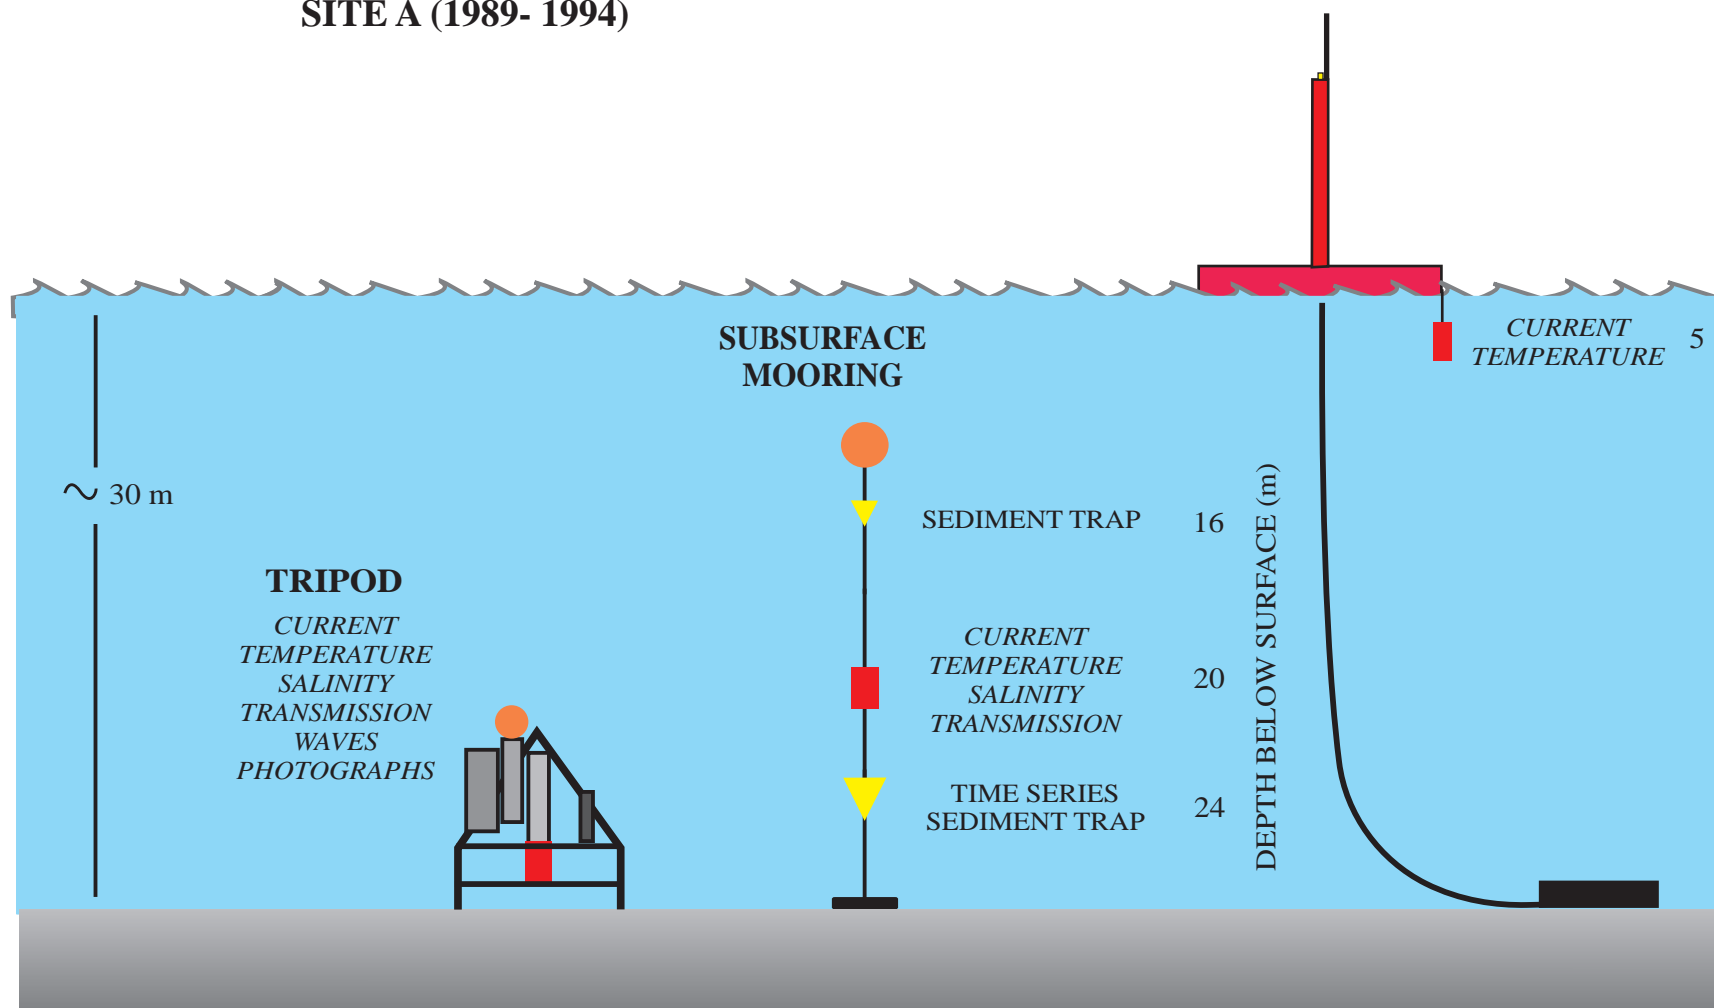

Figure 6A. Schematic of moored instruments at the long-term western Massachusetts Bay Site A (figure 1 and figure 4) from 1989 to 1994. During this period, instruments were deployed from the Large Navigational Buoy, on a subsurface mooring, and on a bottom tripod system. Nominal measurement depths are 1 m above bottom (mab), 10 mab, and 5 m below the surface.
