

Table 23. Concentrations of hormone compounds detected in 1 of 16 set blanks corresponding to samples collected during the Hurricane Sandy reconnaissance study, June–October 2013.

[Concentrations are in micrograms per kilogram]

| Compound | Blank detection |
|--------------------------|------------------------|
| 4-Androstene-3,17-dione | 0.044 |
| 17-alpha-Estradiol | 0.063 |
| 17-beta-Estradiol | 0.065 |
| cis-Androsterone | 0.022 |
| trans-Diethylstilbestrol | 0.450 |
