

Figure 15A. Copper in dry weight from largemouth bass (LMB; *Micropterus salmoides*), blue catfish (CAT; *Ictalurus furcatus*), and striped mullet (MUL; *Mugil cephalus*) collected from Davis Pond postdiversion sites from December 2007 through February 2009. The horizontal line represents the 85th percentile in dry weight from the National Contaminant Biomonitoring Program (Schmitt and Brumbaugh, 1990); for copper it is 3.4 micrograms per gram ($\mu\text{g/g}$).
