Mr. J. L. McCord
Commonwealth Oil Company
615 S. W. Second Avenue
Miami, Florida

Dear Mr. McCord:

The following information concerns the above captioned well
which is at a T. D. of 11,557'.

...
...
...
...
...
...
...
...

Plug on bottom at 8:20 P.M. 10-19-53. Cement will be allowed
to set for 72 hours.

I have picked the following tops, using Schlumberger depths:

Upper Cretaceous	5057'
Lower Cretaceous	7737'
Fredericksberg	9296'
Trinity	10,800'
Sunniland	11,330'
Massive Anhydrite	11,547'

Very truly yours,
COMMONWEALTH OIL COMPANY

James R. Galbraith, Jr.

NOTE:

11,515 - 11,535 lowest zone tested
11,314 - 11,347 reported to be the most promising zone for oil production.
For the results of the several zones drill stem tested see detailed data
in file of Commonwealth Oil Co.
