27	2487-2497	1'	Soft yellowish gray calcareous sandy shale - grains fine
28	2497-2507	10'	Hard gray compact somewhat shaley, very calcareous (rained sand, trace of mica
29	2507-2517	10'	Hard gray compact somewhat shaley very calcareous fine grained sand - strong trace of mica
30	2517-2527	10'	Hard gray compact somewhat shaley very calcareous fine grained sand, strong trace of mica
31	2527-2537	10'	Hard gray very calcareous fine somewhat shaley sand - trace mica
32	2537-2547	9'	Very hard, very calcareous fine grained sand
33	2547-2557	10'	Very hard very calcareous fine grained sand
34	2557-2567	1'	Soft shaley very calcareous fine grained sand trace mica
35	2567-2577	0	
36	2577-2582	4'	Soft shaley very calcareous fine to med. fine gray sand
37	2582-2588	6'	2' soft shaley very calcareous fine to med. fine grained sand; 4' hard shaley calcareous fine sand with "spots" and thin bands of white calcareous med. grain sand
38	2588-2598	5'	Soft bedded slightly calcareous sandy shale, shale dark gray, sand white fine to med. fine grained.
39	2598-2608	3'	Bedded soft slightly calcareous sandy shale, shale dark gray, sand white fine to med. grained.
40	2608-2618	4'	Soft slightly calcareous sandy shale, sand grs. fine
41	2618-2628	6'	Soft slightly calcareous sandy shale, sand grs. fine
42	2628-2638	10'	3' soft slightly calcareous sandy shale, driller reports slight gas odor - not porous enough to carry fluid. 2' bedded slightly calcareous sandy shale, shale gray, sand white fine grained

SUN OIL COMPANY -- DOSTER-LADSON 71 -- LOT 71, L. D. 7, ATKINSON CO., GA.

Core No.	Depth	Rec.	
43	2638-2648	7'	Very soft very slightly sandy shale
44	2648-2658	7'	Soft dark gray calcareous sandy shale - sand grains fine to med. fine
45	2658-2668	9'	Hard bedded slightly calcareous sandy shale, shale dark gray, sand white fine to med. fine in thin layers, bedding planes are flat
46	2668-2678	6'	Hard dark gray sandy shale, white sand in "spots" and bands, grains fine to med. fine
47	2678-2688	2'	Hard dark gray sandy shale, white sand in "spots" and bands, grains fine to med. fine
48	2688-2698	5'	Hard dark gray sandy shale, white and in spots and bands, grains fine to med. fine
49	2698-2708	6'	Hard dark gray slightly sandy shale, white sand in "spots" and bands
50	2708-2716	3'	Soft slightly sandy dark gray shale
51	2716-2728	7'	Soft firm slightly sandy dark gray shale
52	2728-2738	3'	Soft slightly sandy dark gray shale
53	2738-2748	6'	Soft slightly sandy gray dark shale
54	2748-2758	5'	Soft very slightly sandy dark gray shale
55	2758-2768	5'	Soft very slightly sandy dark gray shale
56	2768-2778	5'	Soft slightly sandy dark gray shale
57	2778-2788	5'	Soft sandy dark gray shale
58	2788-2798	7'	Rather hard dark gray sandy shale, fine white sand in thin beds, bedding plane dip flat to 3 degrees
59	2798-2803	2'	Rather hard dark gray slightly sandy shale
60	2803-2813	10'	3' hard dark gray sandy shale, sand in "spots" and thin bands, grains med white and black (salt & pepper) Rec 4' soft shaley sand - grains fine to med., white and black (salt & pepper)
61	2813-2823	2'	Hard dark gray slightly sandy shale
62	2823-2833	2'	Hard dark gray slightly shaley fine grained sand
63	2833-2843	1'	Hard fine grained slightly shaley gray sand, few large fossils?
64	2843-2853	10'	8' firm slightly shaley calcareous fine to med. fine gray sand - grains black and white and 2' very soft, very calcareous and grained sand, grains white and black. <u>No odor</u> nor oil color, large fossils and prisms

SUN OIL COMPANY -- DOSTER LADSON #1 -- LOT 71, L. D. 7, WILKINSON CO., GA.

Core No.	Depth	Rec.	
65	2853-2863	10'	3' firm rather hard gray calcareous sand grains black and white fine to med. 2' firm hard rather tough very calcareous shaley sand, grains fine, white and black
66	2863-2873	5'	Hard firm gray calcareous sandy shale, and grains fine, white
67	2873-2883	5'	Rather soft slightly calcareous dark gray shale
68	2883-2893	6'	Hard calcareous slightly sandy dark gray shale, sand grains fine
69	2893-2903	4'	Firm hard calcareous dark gray shale
70	2903-2913	10'	2' firm hard very calcareous gray sandy lime, 1' hard light gray lime, with fine sand sparingly, 6' firm and very calcareous sand shaley, and 1' firm hard very calcareous sand grains, fine to medium
71	2913-2923	5'	Soft dark gray calcareous sandy shale, sand grains fine
72	2923-2933	8'	3' soft dark gray calcareous sandy shale, grains fine, and 5' hard slightly sandy dark gray shale
73	2933-2943	2'	Hard dark gray slightly sandy shale
74	2943-2953	8'	Hard brittle grayish brown shale, splits easily in bedding planes, planes - flat
75	2953-2963	0	
76	2963-2968	5'	Hard brittle grayish brown shale, splits fairly easily on bedding planes, planes flat
77	2968-2976	5'	2' hard massive, calcareous slightly sand dark gray shale, 3' hard brittle grayish brown shale, splits easily on bedding planes, planes flat
78	2976-2986	4'	Hard brittle calcareous grayish brown shale, splits easily on bedding planes flat
79	2986-2996	3'	Marine hard dark gray calcareous shale
80	2996-3005	8'	Hard marine, slightly sandy very calcareous dark gray shale - grains fine
81	3005-3015	5'	Hard marine, slightly sandy very calcareous dark gray shale
82	3015-3025	6'	Hard marine, slightly sandy very calcareous dark gray shale
83	3025-3035	5'	Hard marine, slightly sandy very calcareous dark gray shale.
84	3035-3045	10'	9' hard firm dark gray very calcareous sandy shale, grains fine. 1' very hard dense greyish white lime

SUN OIL COMPANY -- DOSTER-LAUSON #1 -- LOT 71, L. D. 7, ATKINSON CO., GA.

Core No.	Depth	Rec.	
85	3045-3055	10'	4' hard firm dark gray very calcareous sandy shale, grains fine. 1' very hard dense grayish white line. 3' hard firm dark gray very calcareous sandy shale, grains fine. 6" very hard dense grayish white line, and 1½' hard firm dark gray very calcareous sandy shale grains fine.
86	3055-3065	8'	2' hard firm dark gray very calcareous sandy shale - grains very fine 45 degrees slickensides; 6' rather soft calcareous grayish black shale; (poker chip) bedding planes 5 degrees
87	3065-3075	10'	6' firm rather hard very calcareous grayish black shale with many paper thin layers of fine white sand and 4' rather soft firm grayish black calcareous shale, and 4' rather soft firm grayish black calcareous shale
88	3075-3085	5'	Rather soft calcareous grayish black shale (poker chip)
89	3085-3095	7'	Rather soft calcareous grayish black shale (poker chip)
