

Appendix 5. Borehole geophysical image logs showing orientations of subsurface structural features.

Appendix 5-1. Optical televiewer images and structural orientations of foliation, lithologic contacts, and fractures in well PS-093.

Appendix 5-2. Optical and acoustical televiwer images and structural orientations of foliation, lithologic contacts, and fractures in well PS-094.

Appendix 5-3. Optical televiewer images and structural orientations of foliation, lithologic contacts, and fractures in well PS-095.

Appendix 5-4. Optical and acoustical televIEWER images and structural orientations of primary and secondary fractures in well PS-096.

Appendix 5-5. Optical and acoustical televiwer images and structural orientations of primary and secondary fractures in well PS-097.

Appendix 5-6. Optical televiewer images and structural orientations of foliation, lithologic contacts, and fractures in well PS-098.

Appendix 5-7. Optical televiewer images and structural orientations of foliation, lithologic contacts, and fractures in well PS-099.

Appendix 5-8. Optical televiewer images and structural orientations of foliation, lithologic contacts, and fractures in well PS-100.

Appendix 5-9. Optical and acoustical televiwer images and structural orientations of primary and secondary fractures in well PS-101.

Appendix 5-10. Optical and acoustical televiwer images and structural orientations of foliation, lithologic contacts, and fractures in well PS-102.

Figure 5-11. Optical televiewer images and structural orientations of foliation, lithologic contacts, and fractures in well PS-103.

Appendix 5-12. Optical and acoustical televiwer images and structural orientations of foliation, lithologic contacts, and fractures in well PS-104.

Appendix 5-13. Optical televiewer images and structural orientations of foliation, lithologic contacts, and fractures in well PS-105.

Appendix 5-14. Optical and acoustical televIEWER images and structural orientations of foliation, lithologic contacts, and fractures in well PS-106.

Appendix 5-15. Optical and acoustical televiwer images and structural orientations of fractures in well PS-107.
