

FIELD NAME	FIELD DEFINITION [HWM = high-water mark]
Survey HWM ID	Number of row in spreadsheet of results provided by the subcontractor Dewberry (the surveyors)
Town	Name of town or city in which the HWM is located
Party	Initials of USGS 1- or 2-person crewmembers who flagged the HWM
Date	Date that the HWM was flagged
Quality	A descriptive or numerical rating based on the perceived accuracy of the HWM ² . Ratings are modified from: Lumia, Richard; Burke, P.M.; and Johnston, W.H., 1986, Flooding of December 29, 1984, through January 2, 1985, in northern New York State, with flood profiles of the Black and Salmon Rivers: U.S. Geological Survey Water-Resources Investigations Report 86-4191, 53 p.
Type	A short description of the physical manifestation of the HWM
River or Area	Generally the name of a river or access area; could additionally include a more detailed description of the location
Bank	Right' or 'left' facing in the downstream direction
Location of Mark Relative to Structure or Water	Generally: '___ feet' + 'upstream or downstream' + 'of' + 'bridge or culvert or gage' + '___ feet Landward from edge of water'
Mark Position	Describes location of flagged HWM. Usually relative to side of tree (streamward, landward, US [upstream], or DN [downstream]), diameter of tree, and feet above ground
Marked By	Describes how the HWM was flagged (marker line, nail and flagging, line on stake, top of stake, USGS HWM Disc, nail, paint, or a combination of these)
Comments	Variously completed by field crews. Possible information included: latitude and longitude (lat/long) of the HWM; an associated assessment of lat/long accuracy; detailed description of HWM site; repeats of codes used in other fields; utility pole numbers
Inst. No.	Sequential number automatically assigned by instruments during flagging for right (RH) and left (LH) bank mark locations
Filename	Consists of 'VT', a 3-digit county FIPS code, a 2-letter (internal-use) town code, and a sequential number. 'HWM' was used in the Filename in cases where there would be duplicate filenames without it
Bridge_cul	Bridge or culvert number according to the Vermont Agency of Transportation. Alternatively, type of structure (dam, railroad bridge, suspension bridge, covered bridge)
Road Name	Self explanatory
Lat	Latitude in decimal degrees
Long	Longitude in decimal degrees
Survey Northing	Northing (in feet) referenced to Vermont State Plane Coordinate System NAD83/91 surveyed by Dewberry and documented in the Dewberry report
Survey Easting	Easting (in feet) referenced to Vermont State Plane Coordinate System NAD83/91 surveyed by Dewberry and documented in the Dewberry report
Survey Elevation	Elevation (in feet) referenced to NAVD 88, orthometric heights, Geoid 09, surveyed by Dewberry and documented in the Dewberry report
Fate of flagged HWM³	HWMs were either 'FOUND' with survey results provided in this file, or else an explanation is given for its fate (generally missing, destroyed, or area overgrown).

High-water marks from flooding on Lake Champlain in Vermont, April-June, 2011
