

LEGEND

SEDIMENTARY ROCKS

(Areas of Sedimentary rocks are shown by patterns of parallel lines.)

- XV  
XIV  
 Cbx  
Braxton formation  
*(red and yellow shale and brown sandstone contains two workable coal beds)*
- XIII  
 Cps  
Upshur sandstone  
*(white and brown sandstone conglomerate and blue shale contains coal three beds workable)*
- XII  
 Cpg  
Pugh formation  
*(blue, gray, and black shale and sandstone contains two beds locally workable)*
- XI  
 Cpi  
Pickens sandstone  
*(gray, white and brown sandstone conglomerate and black and gray shale contains coal two beds workable)*
- X  
 Ccn  
Canaan formation  
*(red shale and gray and brown sandstone)*
- X  
 Cgr  
Greenbrier limestone  
*(blue limestone, sandstone and red shale)*
- X  
 Cpo  
Pocono sandstone  
*(gray sandstone in places a conglomerate)*

CARBONIFEROUS

- IX  
 Dh  
Hampshire formation  
*(shale and sandstone, mainly red)*
- VIII  
 Dj  
Jennings formation  
*(olive and yellow shale and brown sandstone)*

DEVONIAN

Sections

Henry Gannett, Chief Topographer.  
Gilbert Thompson, Chief Geographer in charge.  
Triangulation by L.C. Fletcher.  
Topography by L.C. Fletcher.  
Surveyed in 1887-89-91.

Geology by Joseph A. Taff and Alfred H. Brooks.  
Surveyed in 1895.
