

LEGEND

- Paf  
Post-Columbia  
slopes and  
alluvial flats  
*(cut into later-Columbia  
terraces, channels of small  
rivers and stream and  
railroad gradings are not  
represented)*
- Plct  
Later-Columbia  
terraces  
*(plain of later-Platocene  
sediments dissected by the  
present drainage)*
- Pmc  
Mid-Columbia  
slopes  
*(cut into later-early  
Columbia deposition and  
consequently developed in  
late-Columbia and recent  
time)*
- Pect  
Early-Columbia  
terraces  
*(remnants of an early  
Platocene plain)*
- Ppc  
Pre-Columbia  
slopes  
*(cut into pre-Columbia  
time and subsequently  
developed in Columbia  
and recent time)*
- Nlp  
Lafayette  
plain  
*(isolated remnants of a  
once continuous plain of  
Neocene sediments)*

Scale 1:62,500  
Contour interval 20 feet.  
Datum to mean sea level.  
Edition of Feb. 1901.

Geology by N.H. Darton.  
Surveyed 1893-99.
