

Michaelah

U.S. Department of the Interior
U.S. Geological Survey

Michaelah is an environmental chemist in the Organic Geochemistry Research Unit. She received her bachelor of science degree in environmental chemistry from the University of Kansas and her master's degree in biomimicry from Arizona State University.

Michaelah—“I’ve always had a strong desire to make the planet just a little bit better of a place for the creatures inhabiting it. This job has been a fulfilling way of achieving that goal. The science we do is important for understanding human impacts on the environment—and the people are the greatest to work with!”
