

# USGS Environmental Health Program

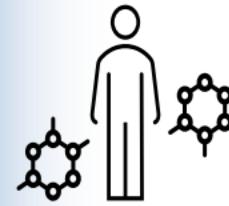

## Per- and Polyfluoroalkyl Substances (PFAS) Science Activities

**Analytical capacity** to measure low levels of PFAS in the environment

**Transport, exposure, and biological effects** of PFAS from source to outcome in watersheds and aquatic ecosystems

**Exposure levels and potential effects** of PFAS mixtures on ecosystem services

**National-scale** drinking water assessments and monitoring PFAS in drinking water

# Visit the USGS Environmental Health (EH) Program PFAS websites for more information:
