

EXPLANATION

Note

Aeromagnetic data are obtained and compiled along a continuous line, whereas ground magnetic surveys are made at separate points. Errors within the normal limits of any magnetic measurement may cause slight discrepancies between flight lines in an aeromagnetic map, which would be more obvious than similar discrepancies between points in a ground magnetic map. For this reason as much care should be exercised in evaluating magnetic features that appear as elongations along a single aeromagnetic traverse as in interpreting an anomaly indicated by a single ground station.

INDEX MAPS

Note: The geology of the Shambo quadrangle by J. H. Kerr and others, 1957, has been published as U. S. Geological Survey Miscellaneous Geologic Investigations Map 1236.

AEROMAGNETIC MAP OF THE SHAMBO QUADRANGLE, BEARPAW MOUNTAINS, MONTANA

By J. R. Balsley, Francis P. Gilbert, George B. Mangan, and others

Scale 1:31 680

Contour Intervals 20, and 100 Gammas

1957

GEOPHYSICAL INVESTIGATIONS  
MAP GP 151
