

EXPLANATION

Magnetic contours showing total intensity magnetic field of the earth in gammas relative to arbitrary datum
Hatched to indicate closed areas of lower magnetic intensity, dashed where data are incomplete

Measured maximum or minimum intensity within closed high or closed low

Flight path
Showing location and spacing of data

NOTE

Aeromagnetic data are obtained and compiled along a continuous line, whereas ground magnetic surveys are made of separate points. Errors within the normal limits of any magnetic measurement may cause slight discrepancies between flight lines in an aeromagnetic map, which would be more obvious than similar discrepancies between points in a ground magnetic map. For this reason as much care should be exercised in evaluating magnetic features that appear as elongations along a single aeromagnetic traverse as in interpreting an anomaly indicated by a single ground station

INDEX MAP OF WISCONSIN SHOWING AREA OF GP-401

Base from U.S. Geological Survey topographic quadrangles

INTERIOR—GEOLOGICAL SURVEY, WASHINGTON, D. C.—62385

Aeromagnetic survey flown at 500 feet above ground, 1956

AEROMAGNETIC MAP OF THE WAUSAU AREA, WISCONSIN

By
John R. Henderson, Natalie S. Tyson, and James R. Page

SCALE 1:48 000

CONTOUR INTERVALS 50 AND 250 GAMMAS

1963
