AEROMAGNETIC MAP OF THE BAGDAD AREA, YAVAPAI COUNTY, ARIZONA

By
W. J. Dempsey, W. D. Fackler, and others

SCALE 1:25,000

CONTOUR INTERVAL 50 GAMMAS

DEPARTMENT OF THE INTERIOR
UNITED STATES GEOLOGICAL SURVEY

GEOPHYSICAL INVESTIGATIONS
MAP GP-411

EXPLANATION

Magnetic contours showing total intensity of the earth's magnetic field, relative to an arbitrary datum, and the intensity deduced when data are complete.

Measured maximum or minimum intensity within closed high or closed low.

Flight path.

NOTE

Aeromagnetic data are obtained and compiled along a continuous line, whereas ground magnetic survey are made at separate points. Errors within the normal limits of any magnetic measurement may cause slight discrepancies between flight lines or an aeromagnetic map, which would be more obvious in the ground magnetic map. For this reason it is recommended that data be examined in evaluating magnetic anomalies, that appear to correlate along a single aeromagnetic traverse or in interpreting an anomaly indicated by a single ground station.
