

EXPLANATION

Magnetic contours showing total intensity magnetic field of the earth in gammas relative to arbitrary datum
 Hashed to indicate closed areas of lower magnetic intensity, dashed where data are incomplete

Measured maximum or minimum intensity within closed high or closed low

Flight path
 Showing location and spacing of data

NOTE

Aeromagnetic data are obtained and compiled along a continuous line, whereas ground magnetic surveys are made at separate points. Errors within the normal limits of any magnetic measurement may cause slight discrepancies between flight lines in an aeromagnetic map, which would be more obvious than similar discrepancies between points in a ground magnetic map. For this reason as much care should be exercised in evaluating magnetic features that appear as elongations along a single aeromagnetic traverse as in interpreting an anomaly indicated by a single ground station

INDEX MAP OF WESTERN MASSACHUSETTS SHOWING AEROMAGNETIC MAPS PUBLISHED BY THE U.S. GEOLOGICAL SURVEY. AREA OF GP-456 SHADED

INDEX MAP OF MASSACHUSETTS SHOWING AREA OF AEROMAGNETIC SURVEY

Topographic base for GP-456 is Pittsfield East quadrangle, 1959

Aeromagnetic survey flown at 500 feet above ground, 1959 and 1962

**AEROMAGNETIC MAP OF THE PITTSFIELD EAST QUADRANGLE
 BERKSHIRE COUNTY, MASSACHUSETTS**

By
 Peter Popenoe, G. R. Boynton, and G. L. Zandle

SCALE 1:24 000

1 5 0 1 KILOMETER
 CONTOUR INTERVALS 20 AND 100 GAMMAS

1964
