

Base from U.S. Geological Survey, 1953

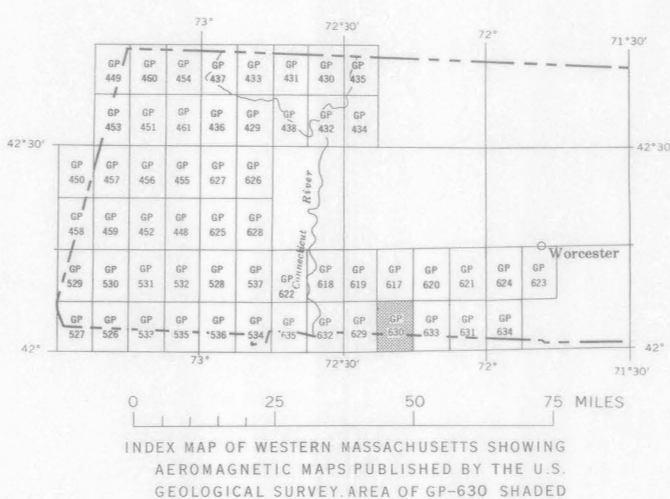

SCALE 1:24 000

Aeromagnetic survey flown at 500 feet above ground, 1959 by Peter Popenoe, and 1965 by P. W. Philbin. Compilation supervised by F. P. Gilbert

EXPLANATION

- Magnetic contours  
Showing total intensity magnetic field of the earth in gammas relative to arbitrary datum. Hachured to indicate closed areas of lower magnetic intensity, dashed where data are incomplete. Contour intervals 20 and 100 gammas
- Location and amount of measured maximum or minimum intensity within closed high or closed low
- Flight path  
Showing location and spacing of data
