

- EXPLANATION**
- Gravity station
 - Bouguer anomaly contour—Contour interval 2 and 10 milligals. Hachures indicate closed area of relative negative anomaly
 - A—Line of gravity profile
 - B—Anomalous area discussed in text
 - Approximate outline of Wilderness Study Area—BRC, Black Ridge Canyons; WC, Westwater Canyon

Base from U.S. Geological Survey, 1:250,000, Grand Junction, Colo., 1958 (revised 1989). Transverse Mercator projection.

Data compiled by R.L. Morin, 1987-88

BOUGUER ANOMALY MAP
MAPS SHOWING INTERPRETATION OF GEOPHYSICAL ANOMALIES OF THE NORTHWESTERN UNCOMPAHGRE UPLIFT AND VICINITY, GRAND COUNTY, UTAH, AND MESA COUNTY, COLORADO
