## LOCKWOOD AND BATEMAN-SHAVER LAKE, CAL. 1:62,500

DEPARTMENT OF THE INTERIOR UNITED STATES GEOLOGICAL SURVEY

## GEOLOGIC MAP OF THE SHAVER LAKE QUADRANGLE, CENTRAL SIERRA NEVADA, CALIFORNIA

By John P. Lockwood and Paul C. Bateman

## **GEOLOGIC MAP SYMBOLS**

## COMMONLY USED ON MAPS OF THE UNITED STATES GEOLOGICAL SURVEY (Special symbols are shown in explanation)

	Contact – Dashed where approximately located; short dashed where inferred; dotted where concealed	Strike and dip of beds — Ball indicates top of beds known from sedimentary structures
^45	Contact - Showing dip; well exposed at triangle	→ Inclined ⊕ Horizontal  → Vertical → 40 Overturned
.20	Fault — Dashed where approximately located; short dashed where inferred; dotted where concealed	Strike and dip of foliation  20 Inclined Vertical Horizontal  Strike and dip of cleavage
	Fault, showing dip — Ball and bar on downthrown side  Normal fault — Hachured on downthrown	Bearing and plunge of lineation  /5  Inclined   ✓ Vertical   Horizontal
	side  Fault — Showing relative horizontal movement	Strike and dip of joints
	Thrust fault — Sawteeth on upper plate  Anticline — Showing direction of plunge; dashed where approximately located; dotted where concealed	Note: planar symbols (strike and dip of beds, foliation or schistosity, and cleavage) may be combined with linear symbols to record data observed at same locality by superimposed symbols at point of observation. Coexisting planar symbols are shown intersecting at point
	Asymmetric anticline – Short arrow indicates steeper limb	of observation.
<del></del>	Overturned anticline - Showing direction of dip of limbs	Shafts  Vertical p Inclined
<del></del>	Syncline - Showing direction of plunge; dashed where approximately located; dotted where concealed	Adit, tunnel, or slope  → Accessible → Inaccessible  x Prospect
+	Asymmetric syncline — Short arrow indicates steeper limb	Quarry  Active Abandoned
<del></del>	Overturned syncline – Showing direction of dip of limbs	Gravel pit ★ Active ★ Abandoned
20	Monocline – Showing direction of plunge of axis  Minor anticline – Showing plunge of axis	Oil well ○ Drilling & Shut-in & Dry hole
- <del></del>	Minor syncline – Showing plunge of axis	<ul> <li>Gas</li> <li>Show of gas abandoned</li> <li>Oil</li> <li>♦ Show of oil</li> </ul>
