GEOLOGIC MAP OF THE INDIAN WATER CANYON QUADRANGLE, MOFFAT COUNTY, COLORADO

By Peter D. Rowley, John R. Dyni, Wallace R. Hansen, and George N. Pipiringos

GEOLOGIC QUADRANGLE MAP Published by the U.S. Geological Survey, 1979 G

GEOLOGIC MAP SYMBOLS COMMONLY USED ON MAPS OF THE UNITED STATES GEOLOGICAL SURVEY (Special symbols are shown in explanation)

	Contact—Dashed where approximately located; short dashed where inferred; dotted where concealed	Strike and dip of beds—Ball indicates top of beds known from sedimentary structures
4 ⁴⁵ y	Contact—Showing dip; well exposed at triangle	Inclined ⊕ Horizontal — Vertical ♣ Overturned
	Fault—Dashed where approximately located; short dashed where inferred; dotted where concealed	Strike and dip of foliation 20 Inclined Vertical Horizontal Strike and dip of cleavage
20	Fault, showing dip—Ball and bar on downthrown side	
		Bearing and plunge of lineation
	Normal fault—Hachured on down- thrown side	/5_ Inclined ◆ Vertical ← Horizontal
	thrown side	Strike and dip of joints
	Fault—Showing relative horizontal movement	40 Inclined - Vertical + Horizontal
	. Thrust fault—Sawteeth on upper plate	Note: Planar symbols (strike and dip of beds, foliation or schistosity, and cleav- age) may be combined with linear
	. Anticline—Showing direction of plunge; dashed where approximately located; dotted where concealed	symbols to record data observed at same locality by superimposed symbols at point of observation. Coexisting planar symbols are shown intersecting at point of observation.
	Asymmetric anticline—Short arrow indicates steeper limb	•
	0 1 1 1 0 0	Shafts
	Overturned anticline—Showing direction of dip of limbs	☑ Vertical ☑ Inclined
	Syncline—Showing direction of plunge; dashed where approximately located; dotted where concealed	Adit, tunnel, or slope — Accessible — Inaccessible
	Asymmetric syncline—Short arrow indicates steeper limb	X Prospect Quarry
	Overturned syncline—Showing direction of dip of limbs	☆ Active ☆ Abandoned Gravel pit
	direction of dip of imas	X Active X Abandoned
+	Monocline—Showing direction of plunge of axis	Oil wells
->→ 20	Minor anticline—Showing plunge of axis	○ Drilling ◇ Shut-in ❖ Dry hole, ☆ Gas ❖ Show of gas abandoned
- ←→ ⁶ ¢	Minor syncline—Showing plunge of axis	● Oil ● Show of oil
