HANSEN AND ROWLEY-STUNTZ RESERVOIR, UTAH-COLO. 1:24,0

## DEPARTMENT OF THE INTERIOR UNITED STATES GEOLOGICAL SURVEY

## GEOLOGIC MAP OF THE STUNTZ RESERVOIR QUADRANGLE, UTAH-COLORADO

By Wallace R. Hansen and Peter D. Rowley

## GEOLOGIC MAP SYMBOLS

## COMMONLY USED ON MAPS OF THE UNITED STATES GEOLOGICAL SURVEY

(Special symbols are shown in explanation)

	Contact—Dashed where approximately located; short dashed where inferred; dotted where concealed	Strike and dip of beds—Ball indicates top of beds known from sedimentary structures
4 <sup>45</sup>	Contact—Showing dip; well exposed at triangle	70 Inclined ⊕ Horizontal  → Vertical → Overturned
	Fault—Dashed where approximately located; short dashed where inferred; dotted where concealed	Strike and dip of foliation  On the Property of the Strike and dip of foliation  On the Property of the Strike and dip of foliation  On the Property of the Strike and dip of foliation  On the Property of the Strike and dip of foliation  On the Property of the Strike and dip of foliation  On the Property of the Strike and dip of foliation  On the Property of the Strike and dip of foliation  On the Property of the Strike and dip of foliation  On the Property of the Strike and dip of foliation  On the Property of the Strike and dip of foliation  On the Strike and dip
	Fault, showing dip—Ball and bar on downthrown side	Strike and dip of cleavage
<del>-                                    </del>	Normal fault—Hachured on down- thrown side	Bearing and plunge of lineation  '5 Inclined    Vertical   Horizontal
<del></del>	Fault—Showing relative horizontal	Strike and dip of joints  40 Inclined • Vertical + Horizontal
	movement  Thrust fault—Sawteeth on upper plate	Note: Planar symbols (strike and dip of beds, foliation or schistosity, and cleav- age) may be combined with linear
<b>-</b>	Anticline—Showing direction of plunge; dashed where approximately located; dotted where concealed	symbols to record data observed at same locality by superimposed symbols at point of observation. Coexisting planar symbols are shown intersecting at point of observation.
	Asymmetric anticline—Short arrow indicates steeper limb	at point of observation.
<del></del>	Overturned anticline—Showing direction of dip of limbs	Shafts  Nertical Inclined
<del></del>	Syncline—Showing direction of plunge; dashed where approximately located; dotted where concealed	Adit, tunnel, or slope  → Accessible → Inaccessible
<del>-</del>	Asymmetric syncline—Short arrow indicates steeper limb	X Prospect  Quarry  ★ Active ★ Abandoned
<del></del>	Overturned syncline—Showing direction of dip of limbs	Gravel pit
<b>+</b>	Monocline—Showing direction of plunge of axis	Oil wells
→→ <sup>20</sup>	Minor anticline—Showing plunge of axis	○ Drilling ◇ Shut-in → Dry hole, ☆ Gas ❖ Show of gas abandoned
<del></del> €-•60	Minor syncline—Showing plunge of axis	Oil    Show of oil
