PECK-MERCED PEAK, CALIF.

DEPARTMENT OF THE INTERIOR UNITED STATES GEOLOGICAL SURVEY

GEOLOGIC MAP OF THE MERCED PEAK QUADRANGLE, CENTRAL SIERRA NEVADA, CALIFORNIA

By Dallas L. Peck

## GEOLOGIC MAP SYMBOLS COMMONLY USED ON MAPS OF THE UNITED STATES GEOLOGICAL SURVEY (Special symbols are shown in explanation)

	Contact—Dashed where approximately located; short dashed where inferred; dotted where concealed	Strike and dip of beds—Ball indicates top of beds known from sedimentary structures
^4 <sup>5</sup>	Contact—Showing dip; well exposed at triangle	Inclined ⊕ Horizontal  Wertical ⊕ Overturned
	Fault—Dashed where approximately located; short dashed where inferred; dotted where concealed	Strike and dip of foliation  2 Inclined   Vertical Horizontal  Strike and dip of cleavage
20	Fault, showing dip—Ball and bar on downthrown side	Inclined
<del></del>	Normal fault—Hachured on down- thrown side	Bearing and plunge of lineation  '5 Inclined
<del></del>	. Fault—Showing relative horizontal movement	40 Inclined Vertical + Horizontal
	. Thrust fault—Sawteeth on upper plate	Note: Planar symbols (strike and dip of beds, foliation or schistosity, and cleav- age) may be combined with linear
<b>4</b>	Anticline—Showing direction of plunge; dashed where approximately located; dotted where concealed	symbols to record data observed at same locality by superimposed symbols at point of observation. Coexisting planar symbols are shown intersecting at point of observation.
	Asymmetric anticline—Short arrow indicates steeper limb	at point of observation.
<u> </u>	Overturned anticline—Showing direction of dip of limbs	Shafts  Vertical Inclined
+	Syncline—Showing direction of plunge; dashed where approximately located; dotted where concealed	Adit, tunnel, or slope  — Accessible  — Inaccessible
	Asymmetric syncline—Short arrow indicates steeper limb	X Prospect  Quarry  X Active X Abandoned
<del></del>	Overturned syncline—Showing direction of dip of limbs	Gravel pit
<b>4</b>	Monocline—Showing direction of plunge of axis	X Active X Abandoned Oil wells
→→ <sup>20</sup>	Minor anticline—Showing plunge of axis	○ Drilling ◇ Shut-in → Dry hole,  ☆ Gas ❖ Show of gas abandoned
-€-60	Minor syncline—Showing plunge of axis	• Oil • Show of oil
