GEOLOGIC MAP OF THE KANAB QUADRANGLE, KANE COUNTY, UTAH, AND MOHAVE AND COCONINO COUNTIES, ARIZONA

By K. A. Sargent and B. C. Philpott
GEOLOGIC MAP SYMBOLS
COMMONLY USED ON MAPS OF THE UNITED STATES GEOLOGICAL SURVEY
(Special symbols are shown in explanation)

---····· Contact - Dashed where approximately located; short dashed where inferred; dotted where concealed

Contact - Showing dip; well exposed at triangle

------- Fault - Dashed where approximately located; short dashed where inferred; dotted where concealed

Fault, showing dip - Ball and bar on downthrown side

Normal fault - Hachured on downthrown side

Fault - Showing relative horizontal movement

Thrust fault - Sawteeth on upper plate

Anticline - Showing direction of plunge; dashed where approximately located; dotted where concealed

Asymmetric anticline - Short arrow indicates steeper limb

Overtopped anticline - Showing direction of dip of limbs

Synecline - Showing direction of plunge; dashed where approximately located; dotted where concealed

Asymmetric syncline - Short arrow indicates steeper limb

Overtopped syncline - Showing direction of dip of limbs

Monocline - Showing direction of plunge of axis

Minor anticline - Showing plunge of axis

Minor syncline - Showing plunge of axis

Strike and dip of beds - Ball indicates top of beds known from sedimentary structures

\[ \text{\textdegree} \] Inclined \( \text{\textdegree} \) Horizontal
\[ \text{\triangle} \] Vertical \[ \text{\triangle} \] Overturned

Strike and dip of foliation

\[ \text{\textdegree} \] Inclined \( \text{\textdegree} \) Vertical \( \text{\textdegree} \) Horizontal

Strike and dip of cleavage

\[ \text{\textdegree} \] Inclined \( \text{\textdegree} \) Vertical \( \text{\textdegree} \) Horizontal

Bearing and plunge of lineation

\[ \text{\textdegree} \] Inclined \( \text{\textdegree} \) Vertical \( \text{\textdegree} \) Horizontal

Strike and dip of joints

---\( \text{\textdegree} \) Inclined \( \text{\textdegree} \) Vertical \( \text{\textdegree} \) Horizontal

Note: planar symbols (strike and dip of beds, foliation or schistosity, and cleavage) may be combined with linear symbols to record data observed at same locality by superimposed symbols at point of observation. Coexisting planar symbols are shown intersecting at point of observation.

--- Shafts

\( \bullet \) Vertical \( \bullet \) Inclined

--- Adit, tunnel, or slope

\( \rightarrow \) Accessible \( \rightarrow \) Inaccessible

--- Prospect

Quarry

\( \times \) Active \( \times \) Abandoned

--- Gravel pit

\( \times \) Active \( \times \) Abandoned

Oil well

\( \circ \) Drilling \( \circ \) Shut-in \( \circ \) Dry hole

\( \times \) Gas \( \times \) Show of gas abandoned

\( \bullet \) Oil \( \bullet \) Show of oil
