 Contact — Showing dip; well exposed at triangle

--- Fault — Dashed where approximately located; short dashed where inferred; dotted where concealed

 Fault, showing dip — Ball and bar on downthrown side

 Normal fault — Hachured on downthrown side

 Fault — Showing relative horizontal movement

 Thrust fault — Sawteeth on upper plate

 Anticline — Showing direction of plunge; dashed where approximately located; dotted where concealed

 Asymmetric anticline — Short arrow indicates steeper limb

 Overturned anticline — Showing direction of dip of limbs

 Syncline — Showing direction of plunge; dashed where approximately located; dotted where concealed

 Asymmetric syncline — Short arrow indicates steeper limb

 Overturned syncline — Showing direction of dip of limbs

 Monocline — Showing direction of plunge of axis

 Minor anticline — Showing plunge of axis

 Strike and dip of joints

 Note: planar symbols (strike and dip of beds, foliation or schistosity, and cleavage) may be combined with linear symbols to record data observed at same locality by superimposed symbols at point of observation. Coexisting planar symbols are shown intersecting at point of observation.
