

FIGURE 3.—Rate of travel for subreach discharge for Coast Fork Willamette River.

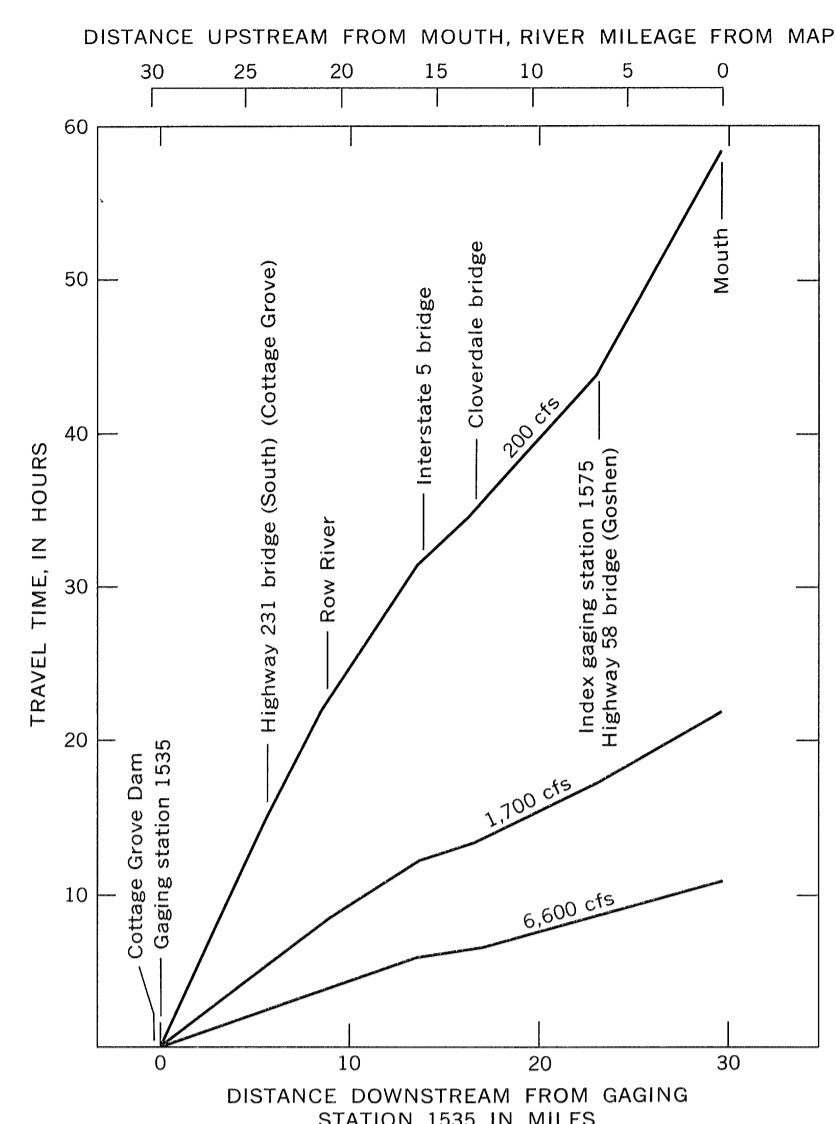

FIGURE 4.—Time of travel of Coast Fork Willamette River for selected discharges at index gaging station 1575 (near Goshen).

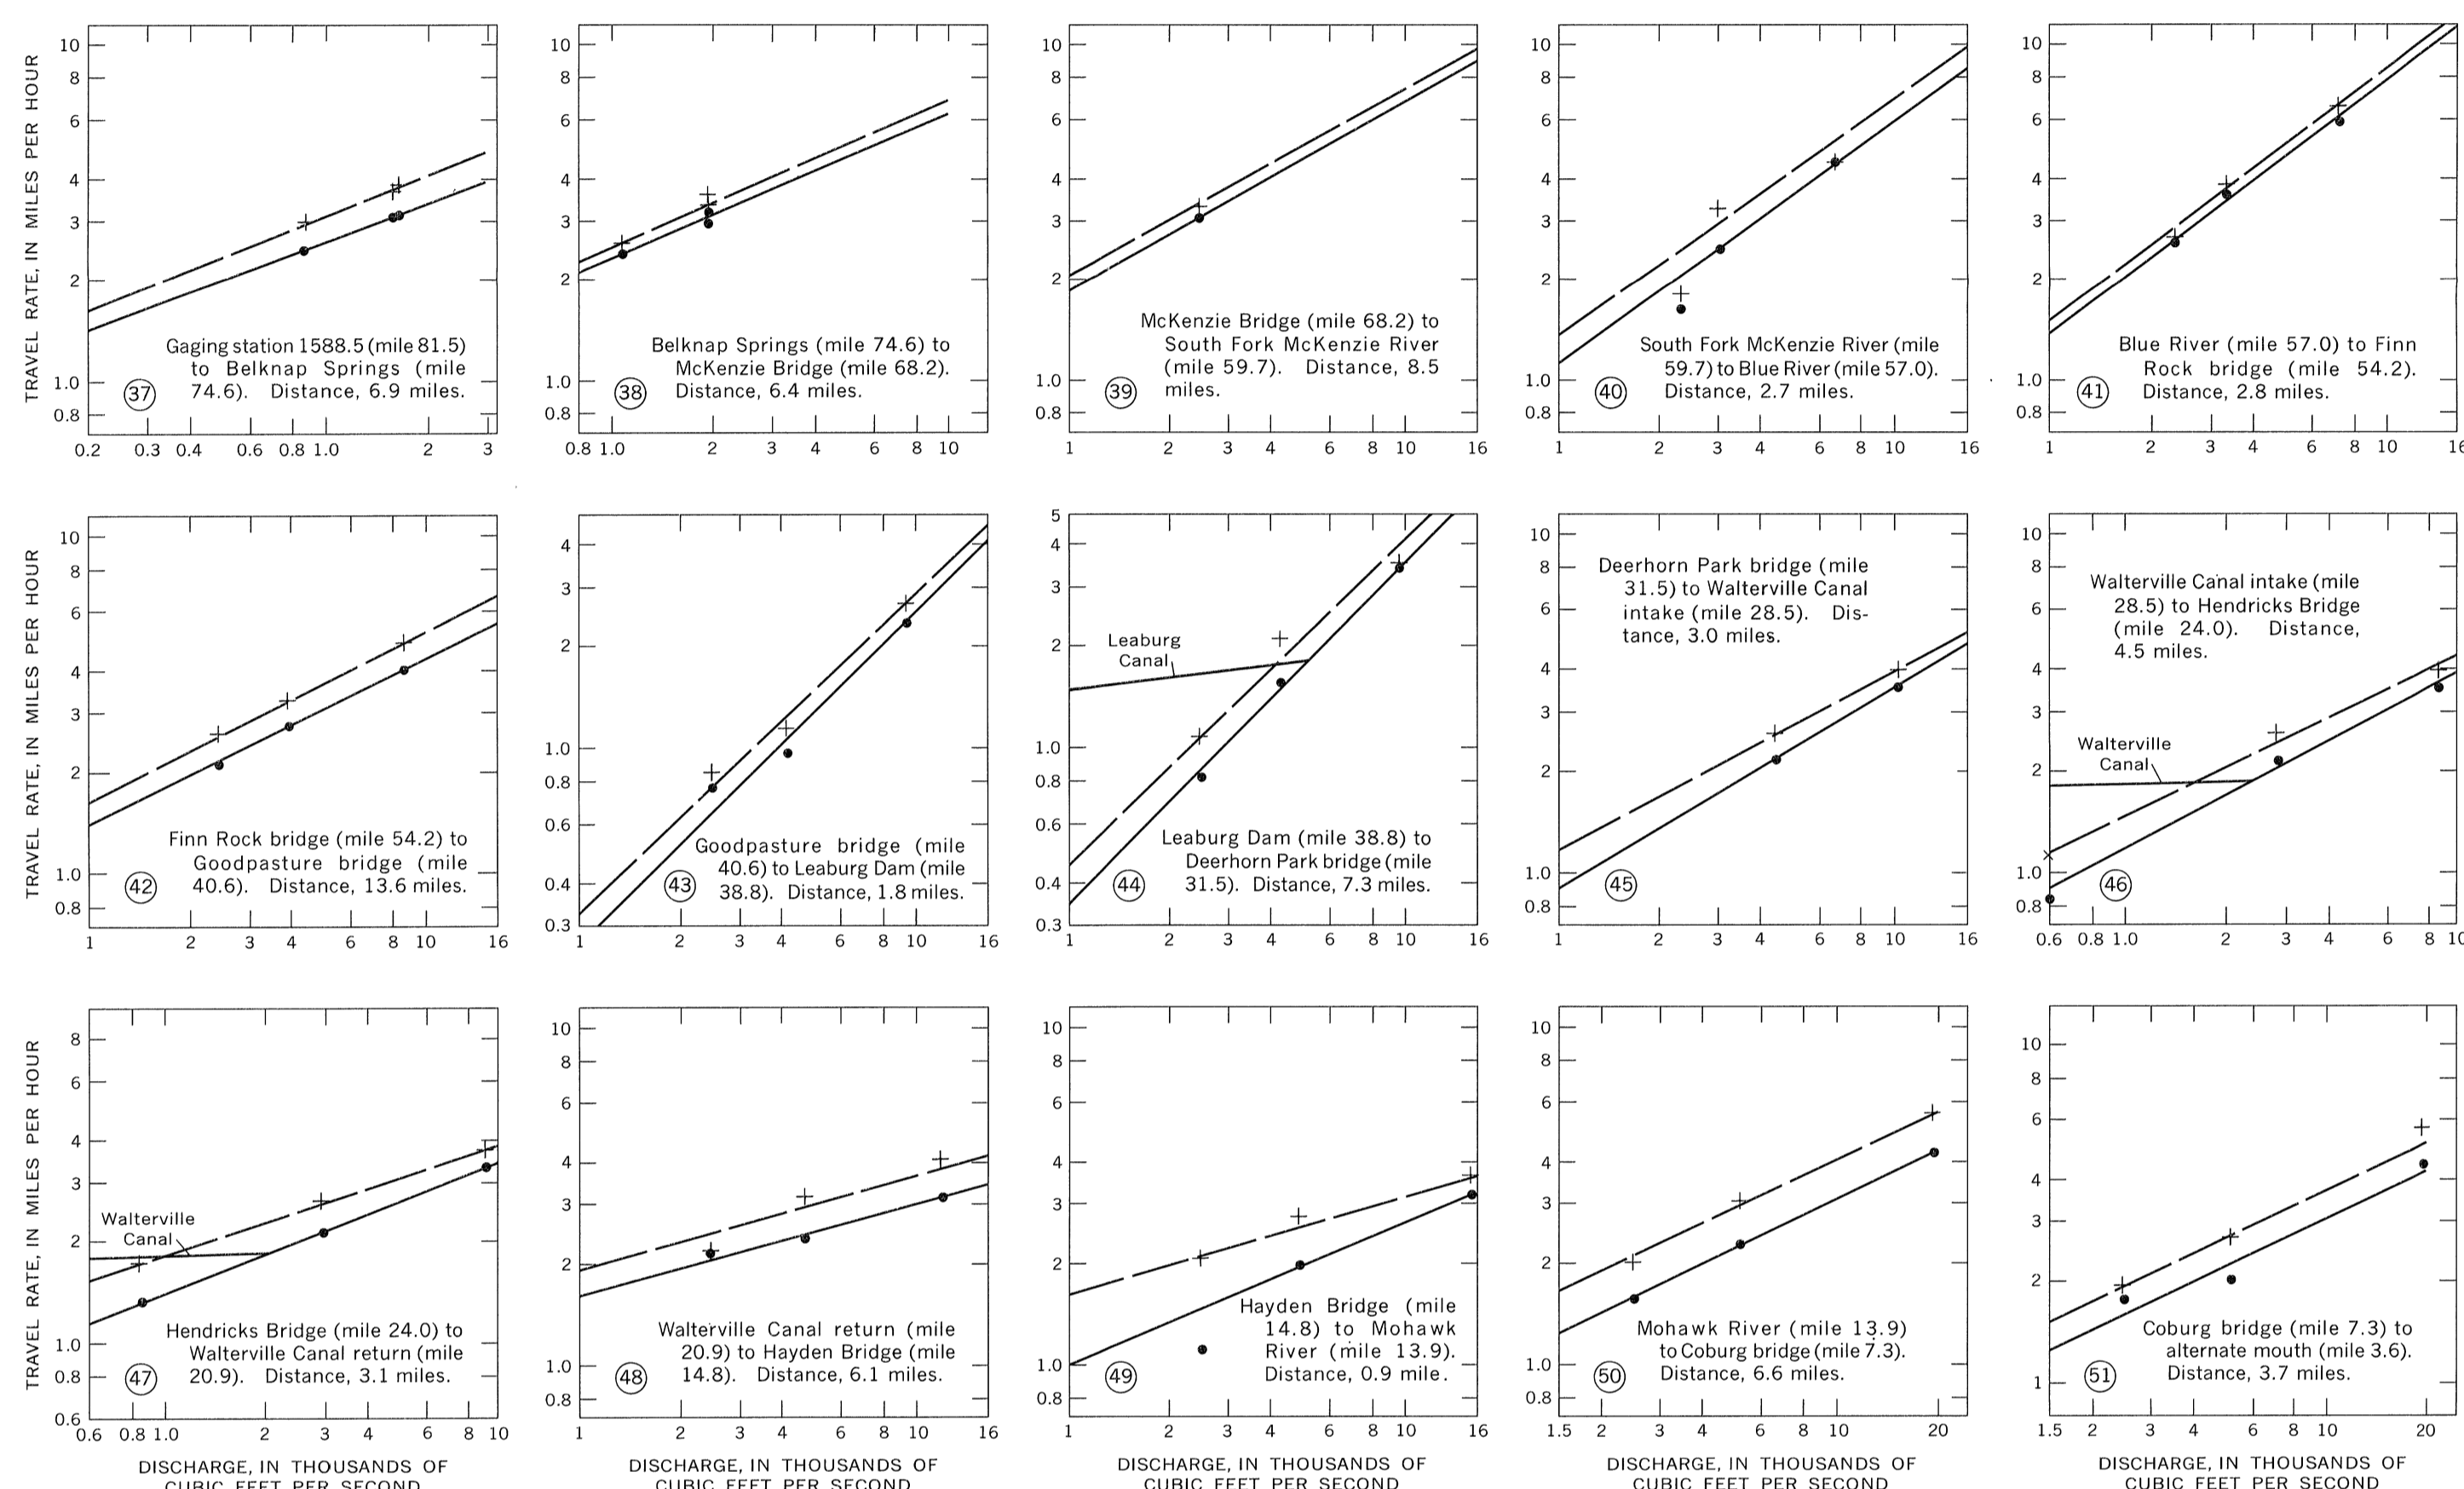

FIGURE 5.—Rate of travel for subreach discharge for McKenzie River.

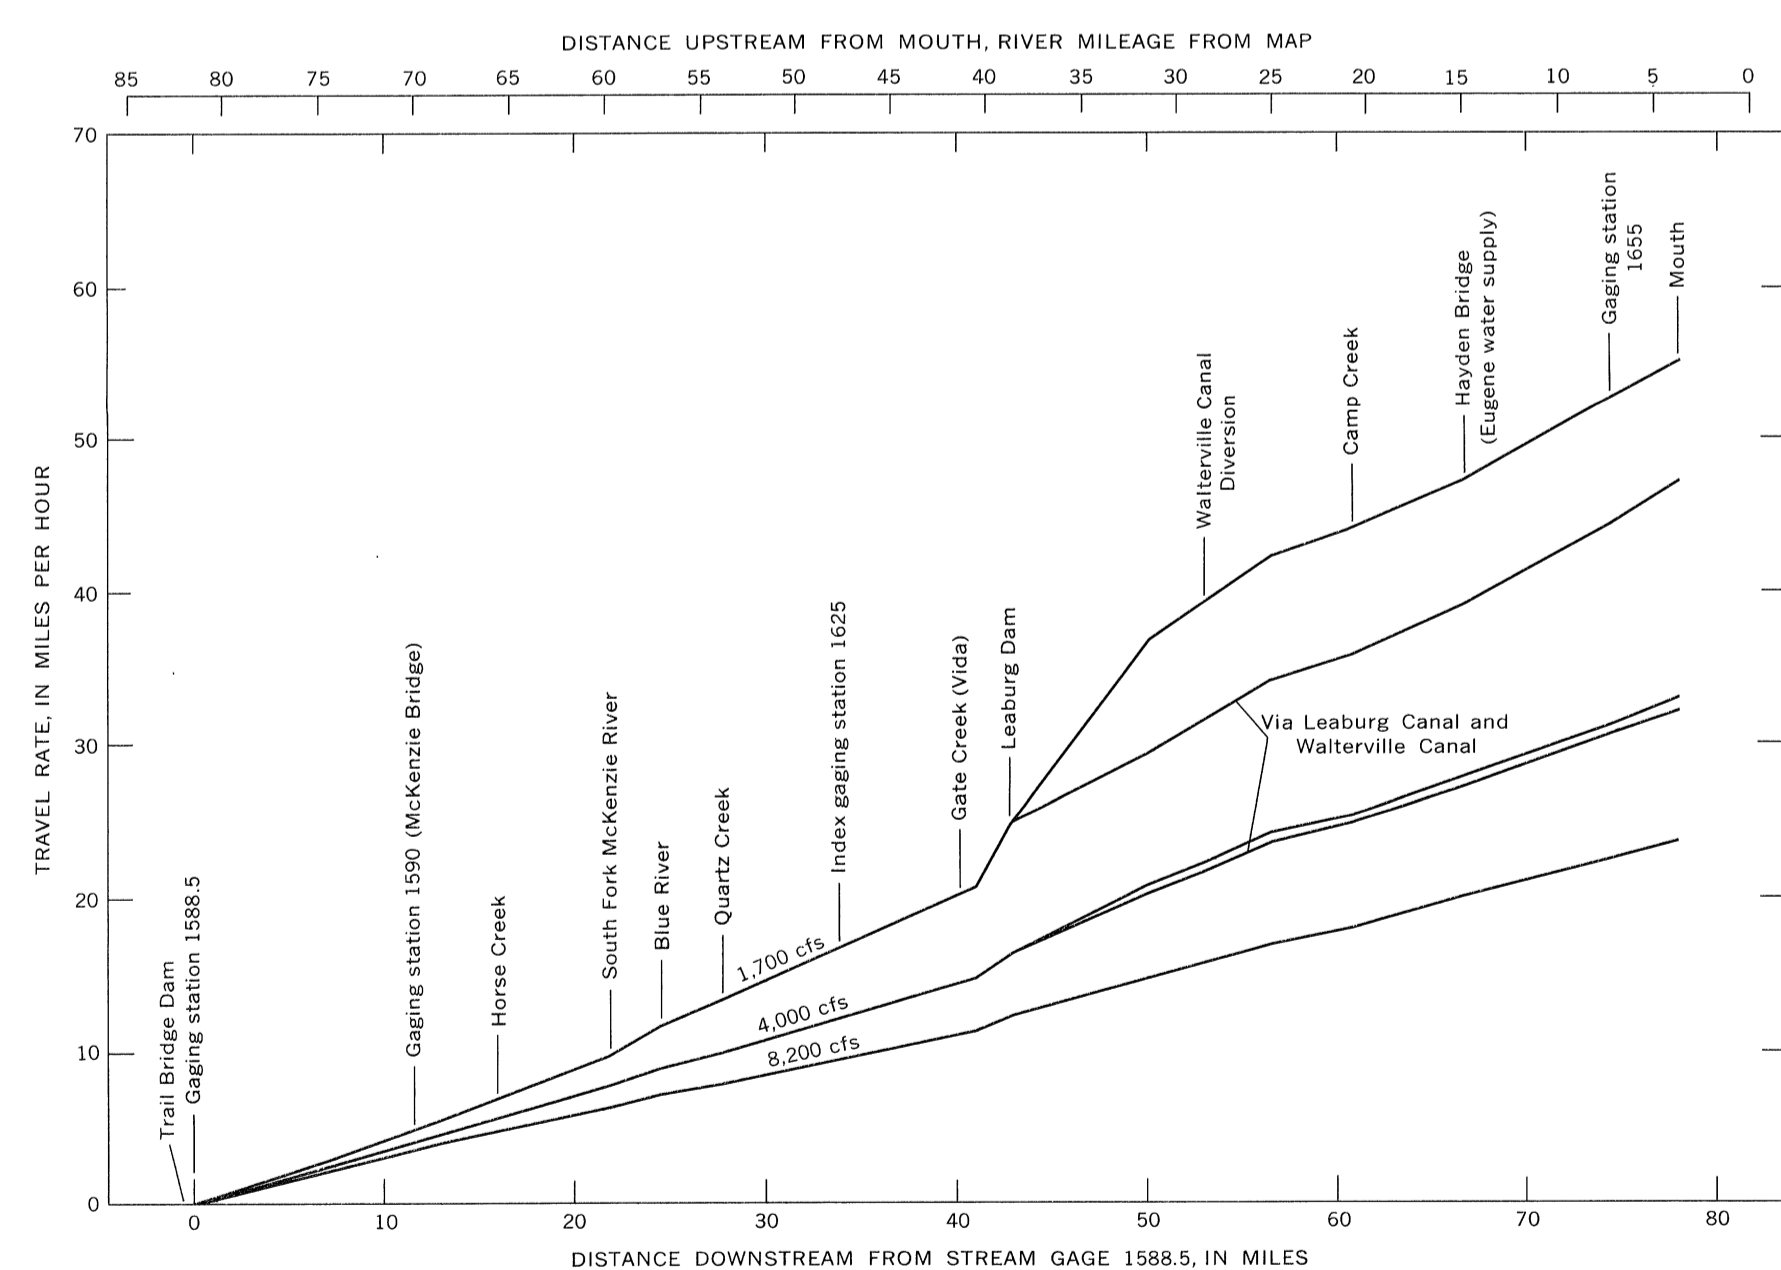

FIGURE 6.—Time of travel of McKenzie River for selected discharges at index gaging station 1825 (near Vida).

TRAVEL RATES OF WATER FOR SELECTED STREAMS IN THE WILLAMETTE RIVER BASIN, OREGON

By
David D. Harris
1968

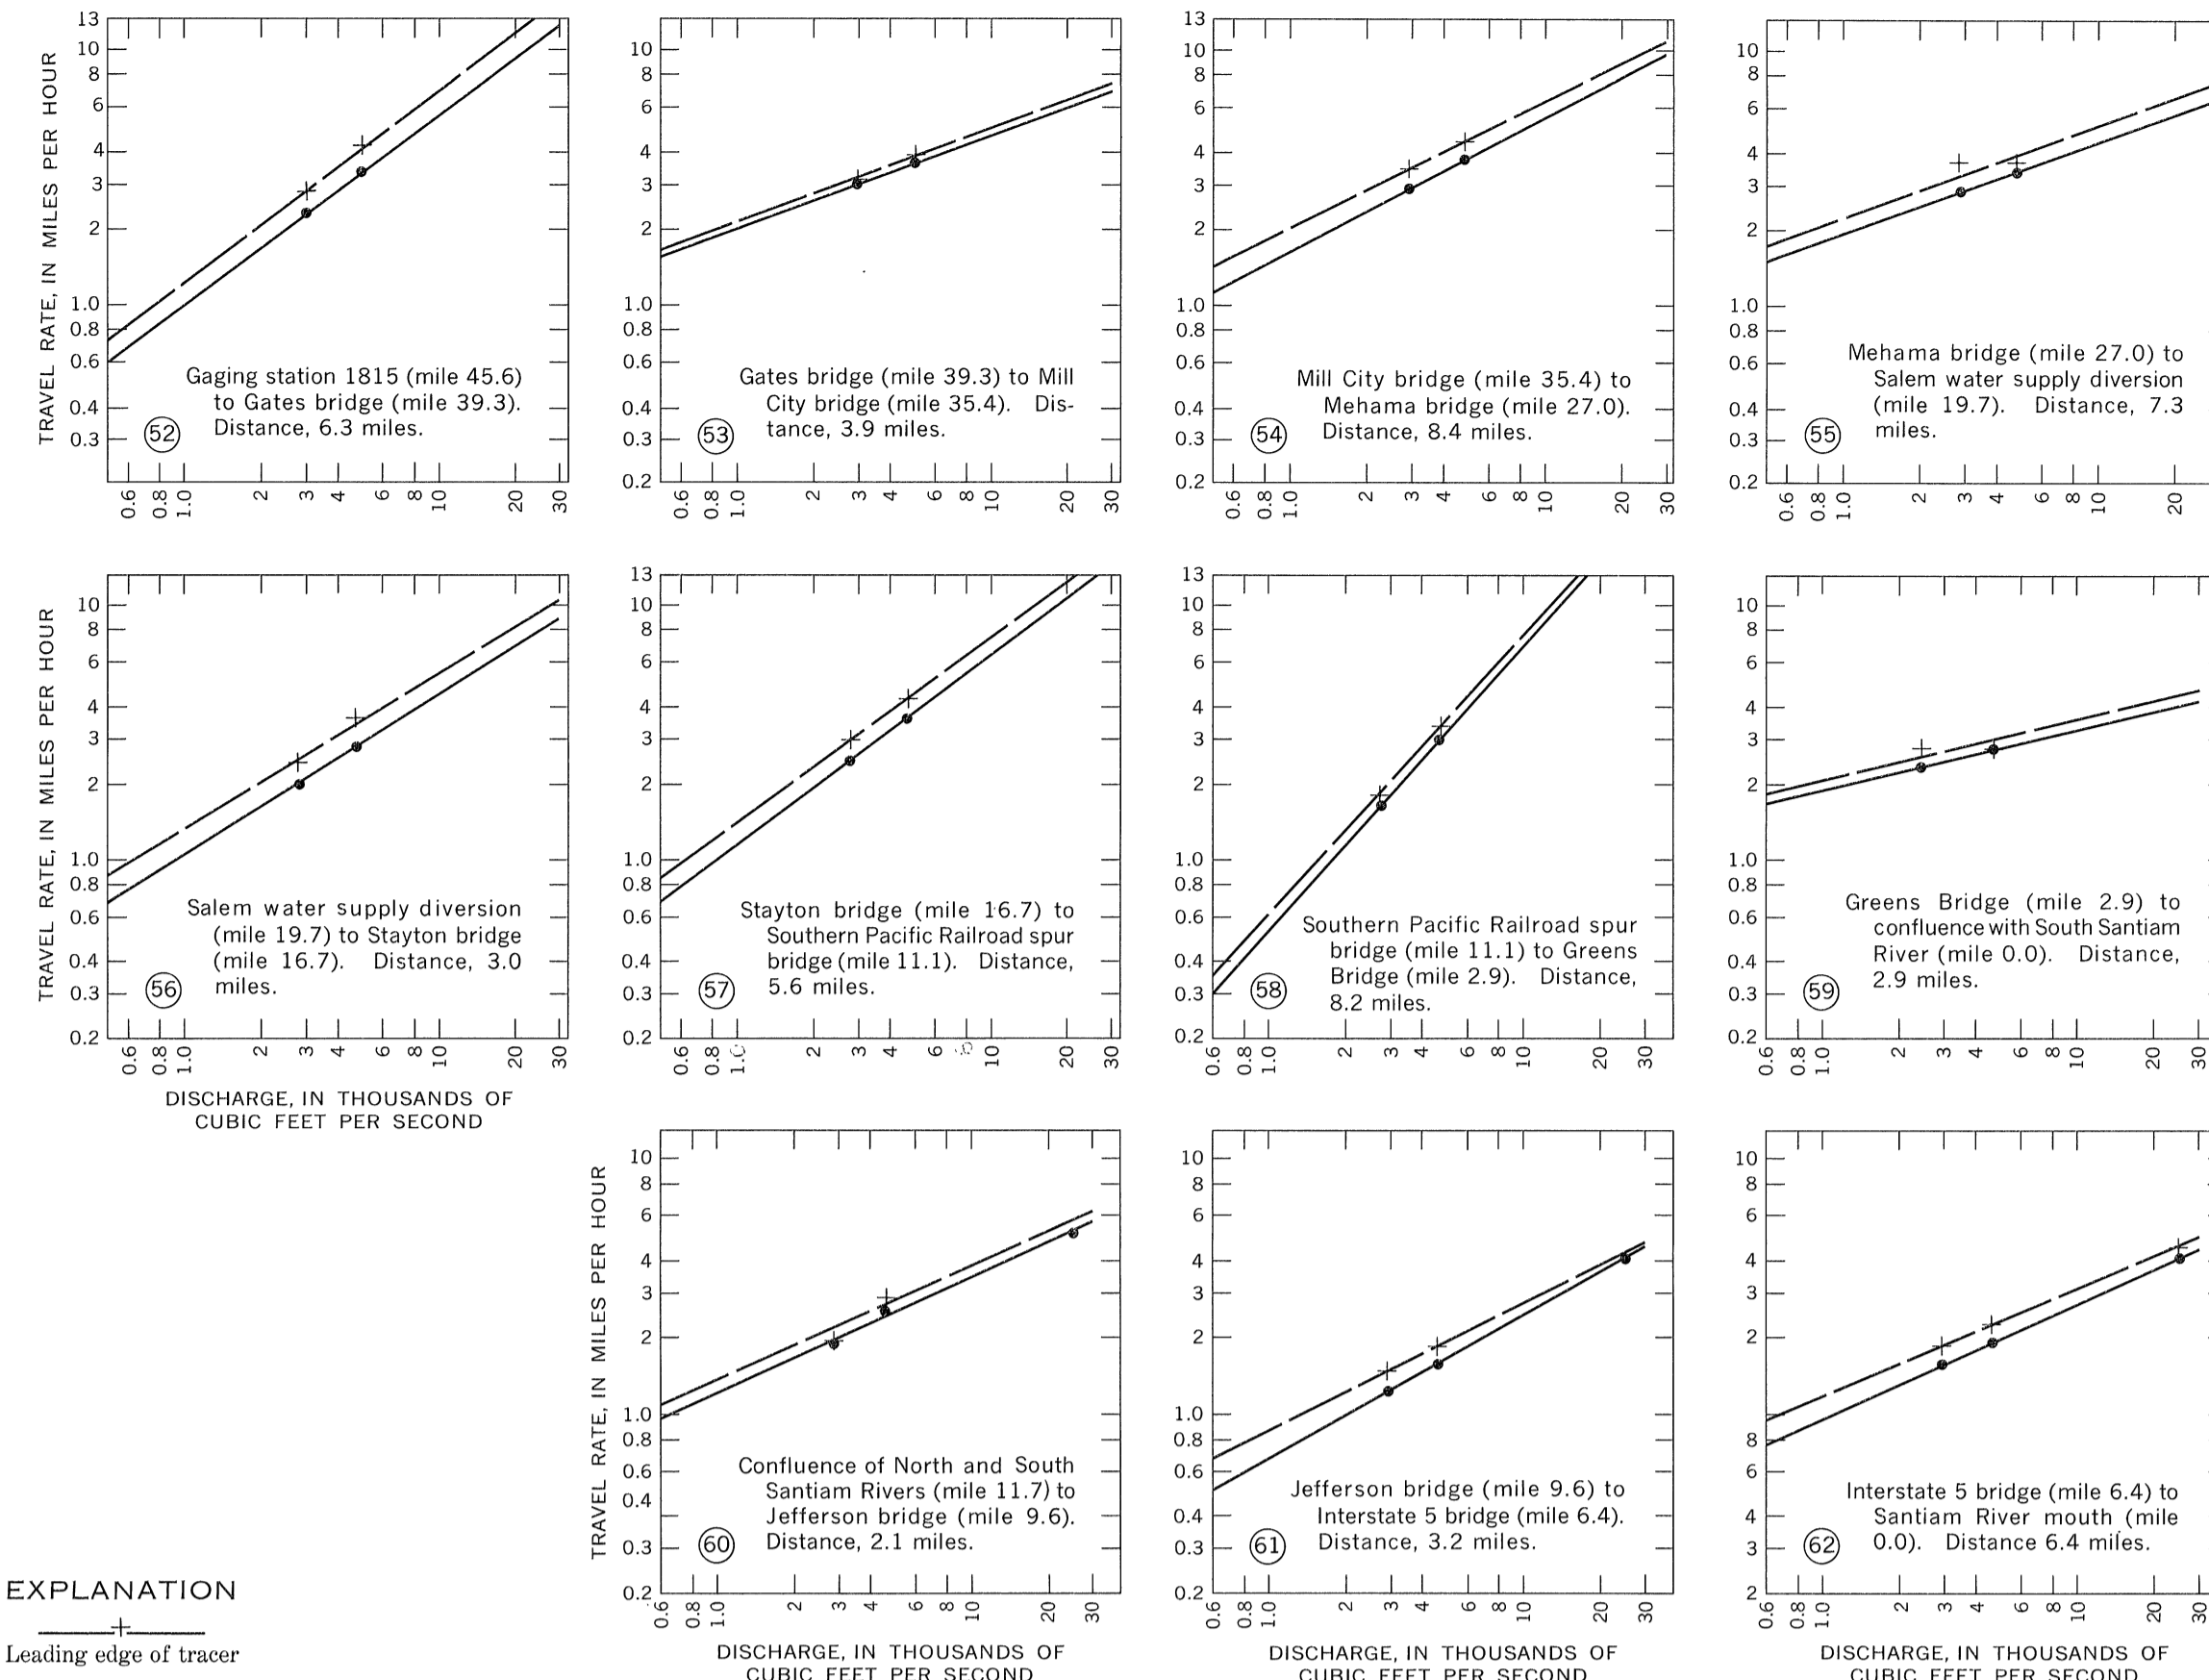

FIGURE 7.—Rate of travel for subreach discharge for North Santiam River (subreaches 52-59) and Santiam River (subreaches 60-62).

EXPLANATION
+ Leading edge of tracer
● Peak concentration of tracer
② Subreach number

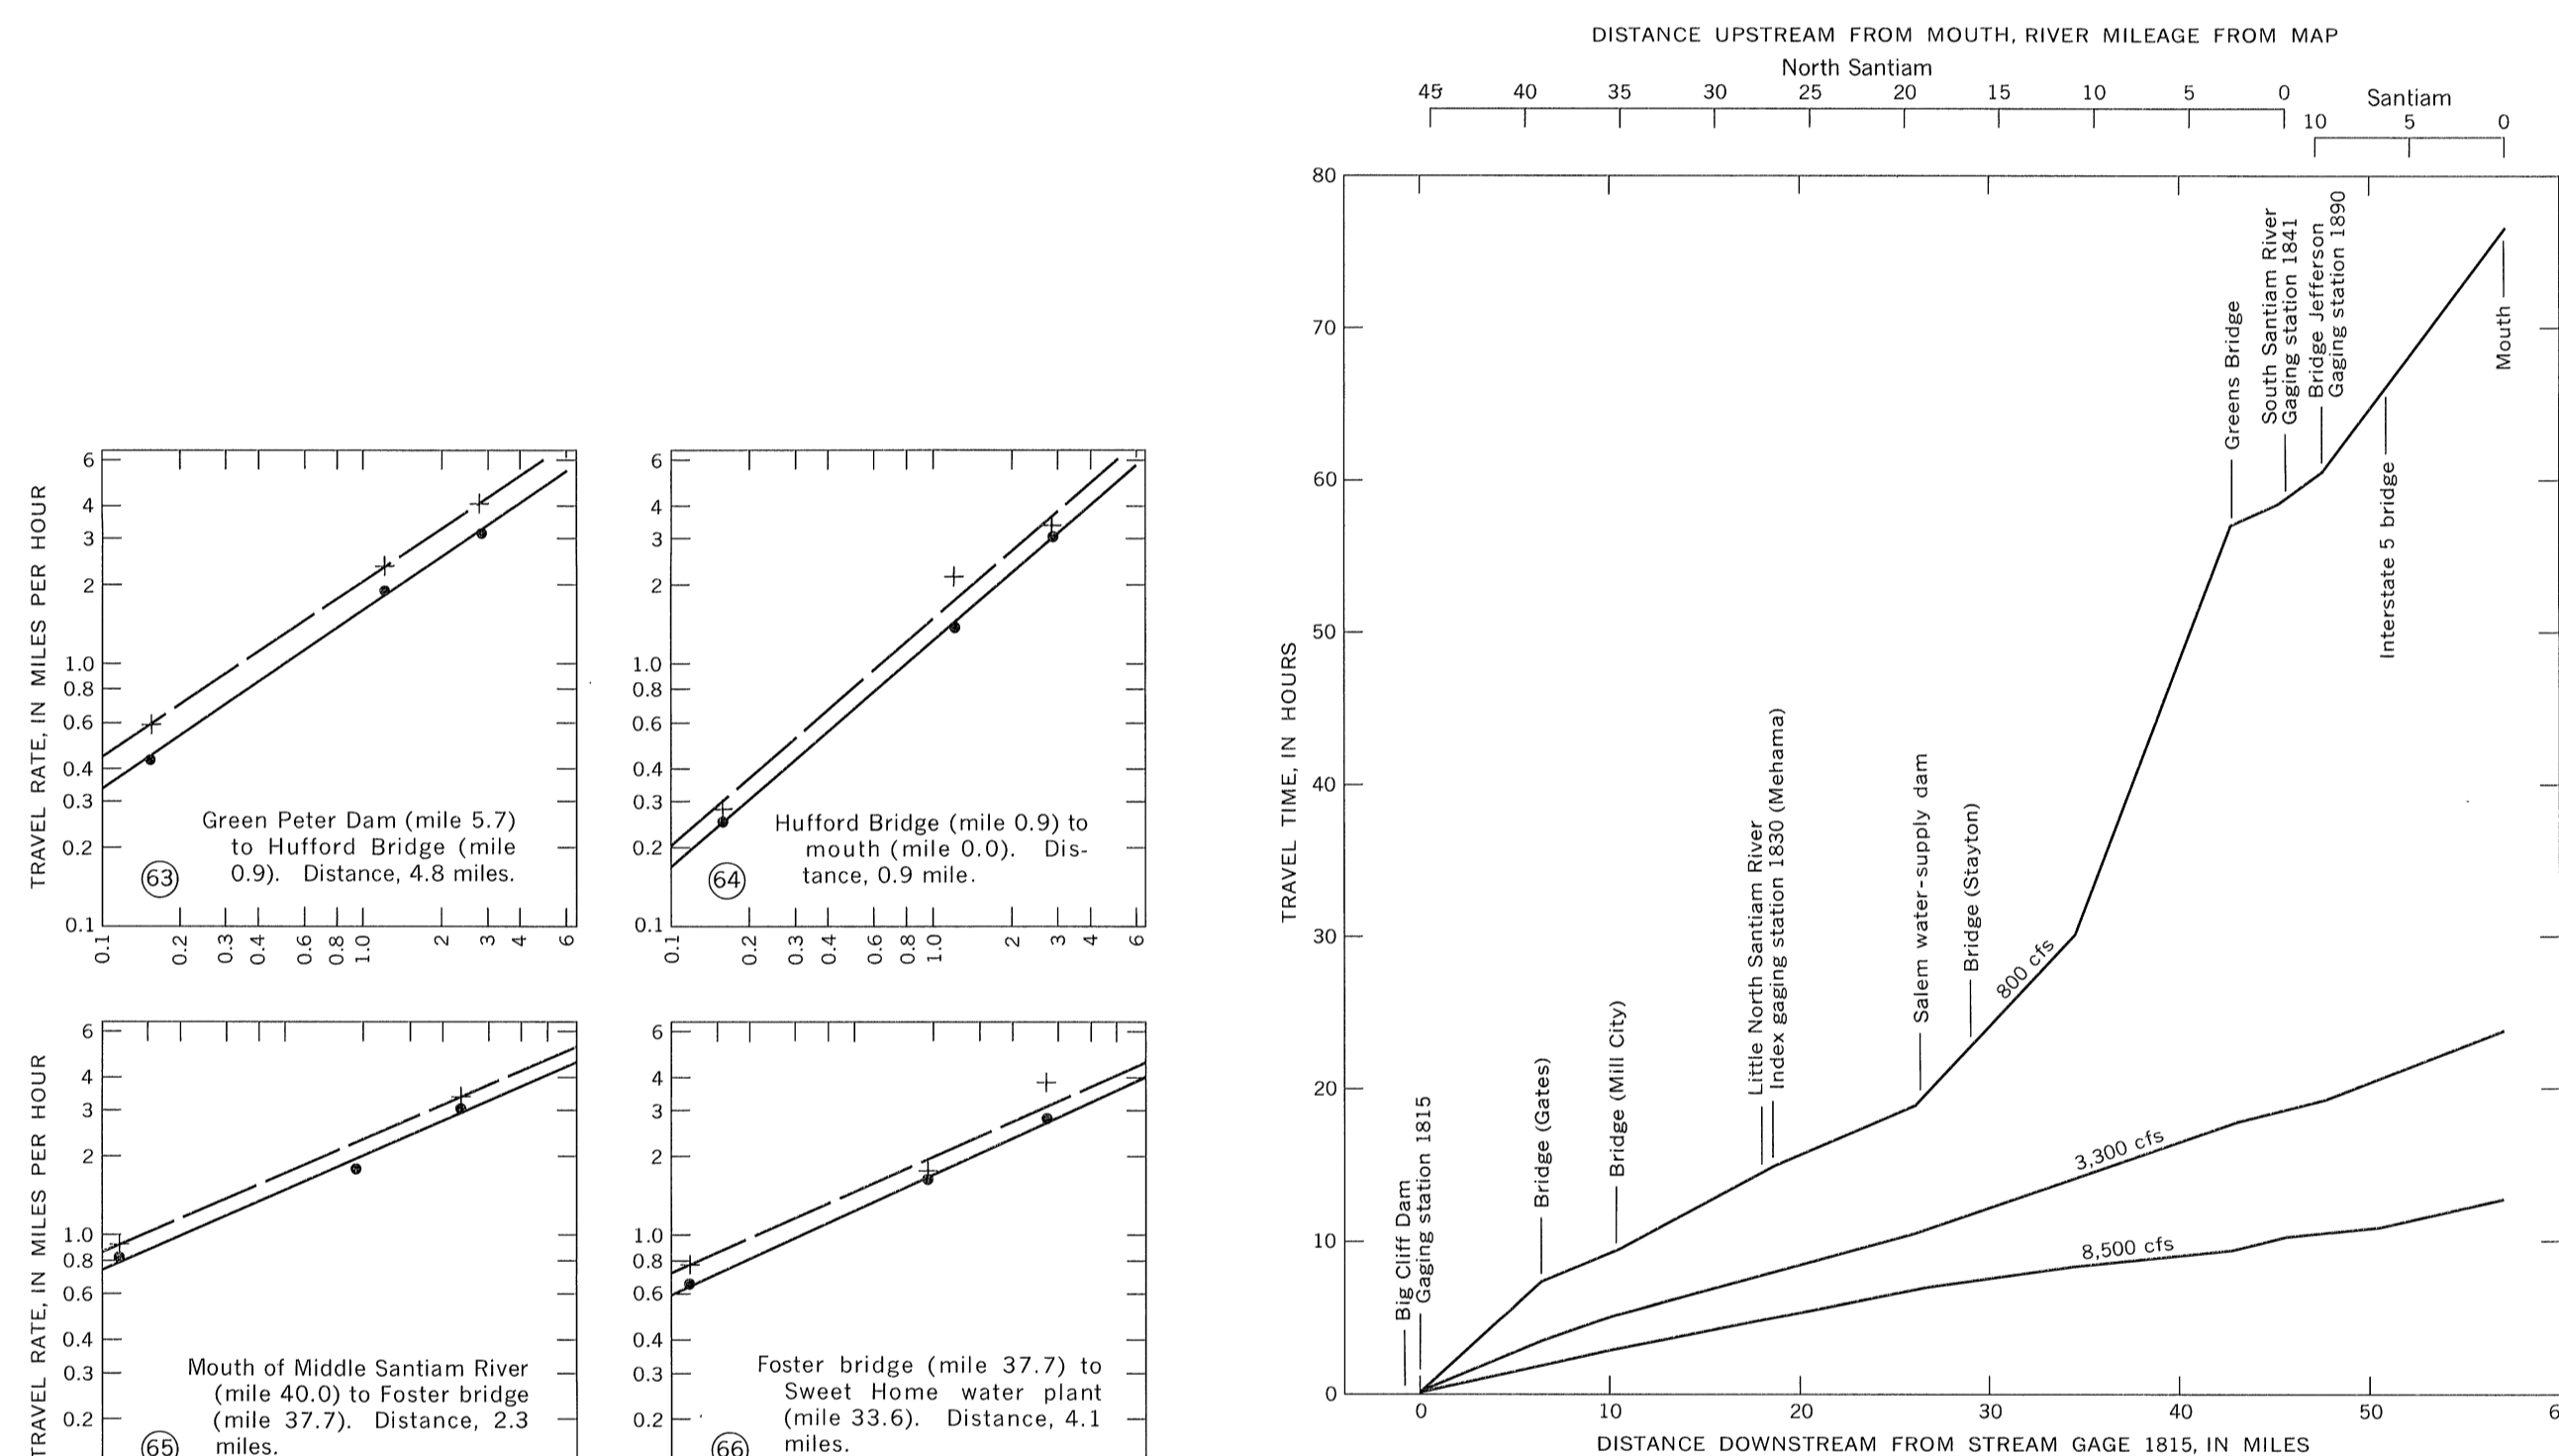

FIGURE 8.—Time of travel of North Santiam and Santiam Rivers for selected discharges at index gaging station 1830 (Mehama).

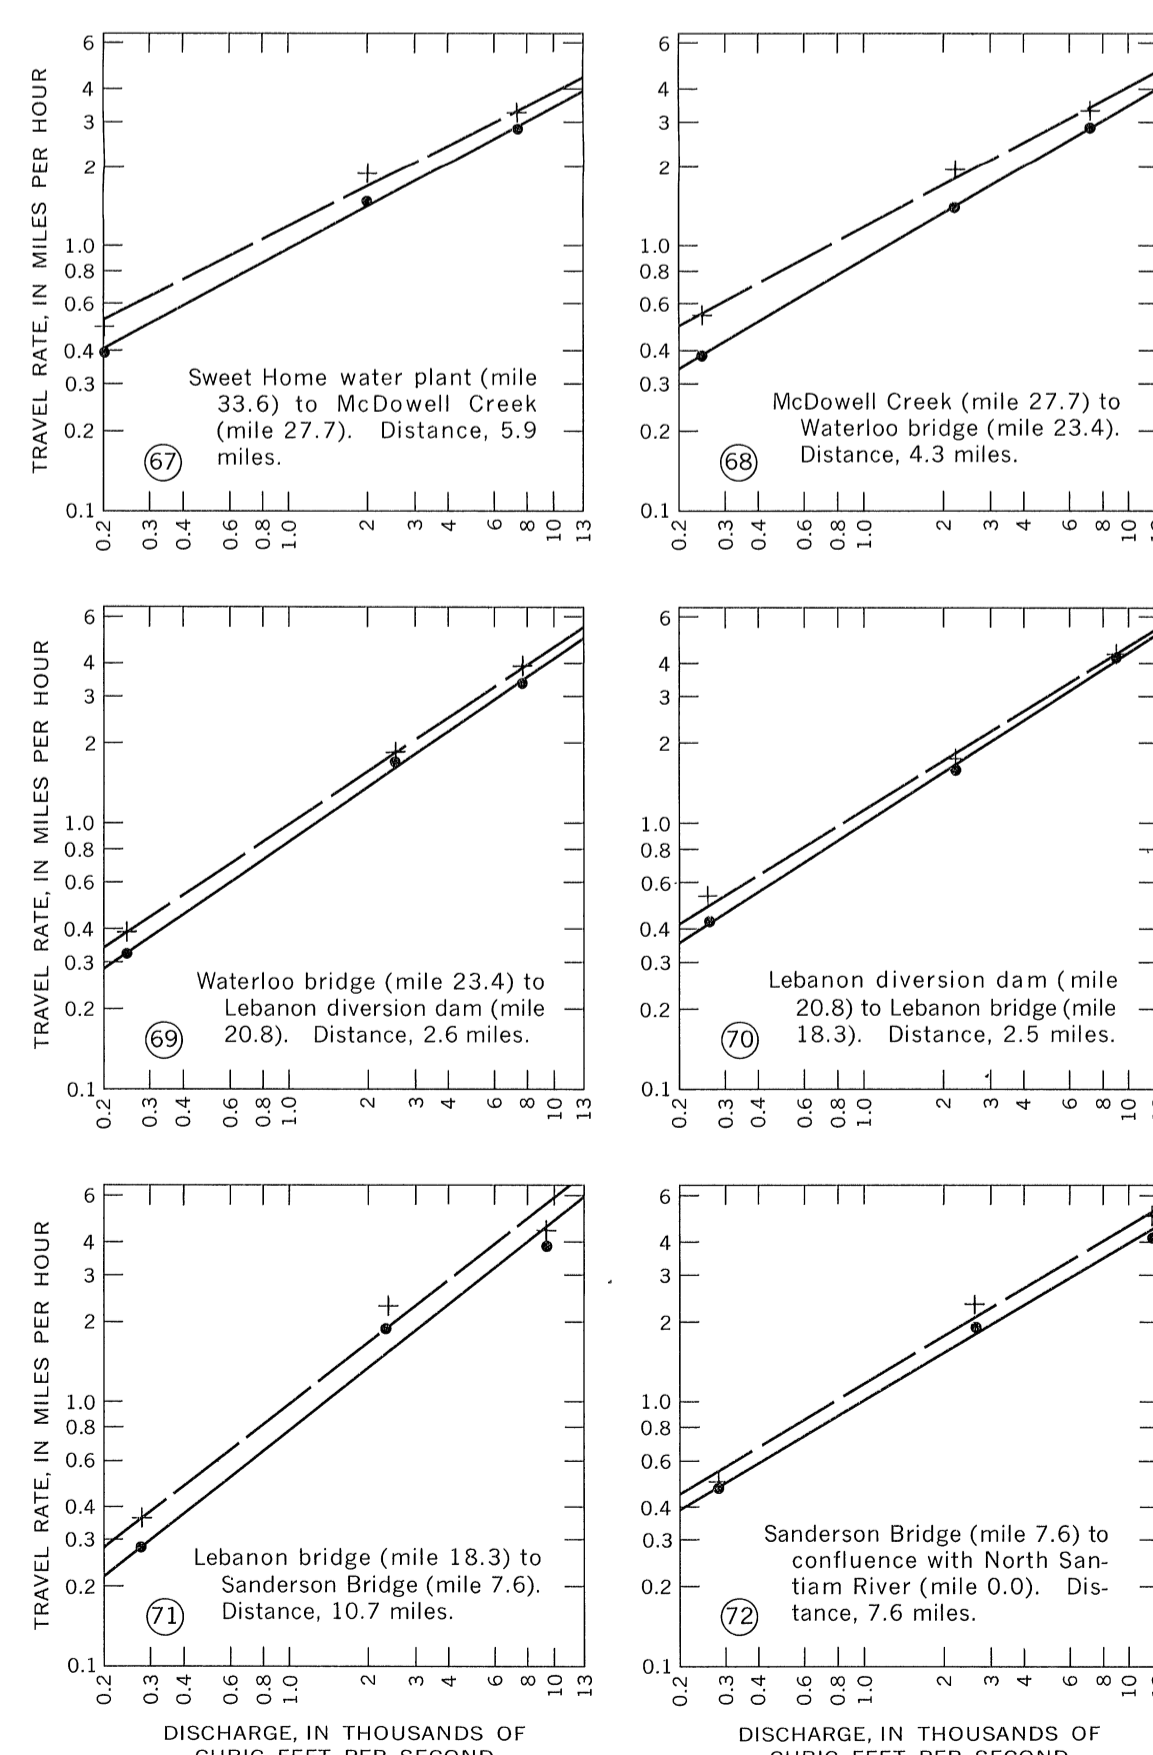

FIGURE 9.—Rate of travel for subreach discharge for Middle Santiam River (subreaches 63 and 64) and South Santiam River (subreaches 65-72).

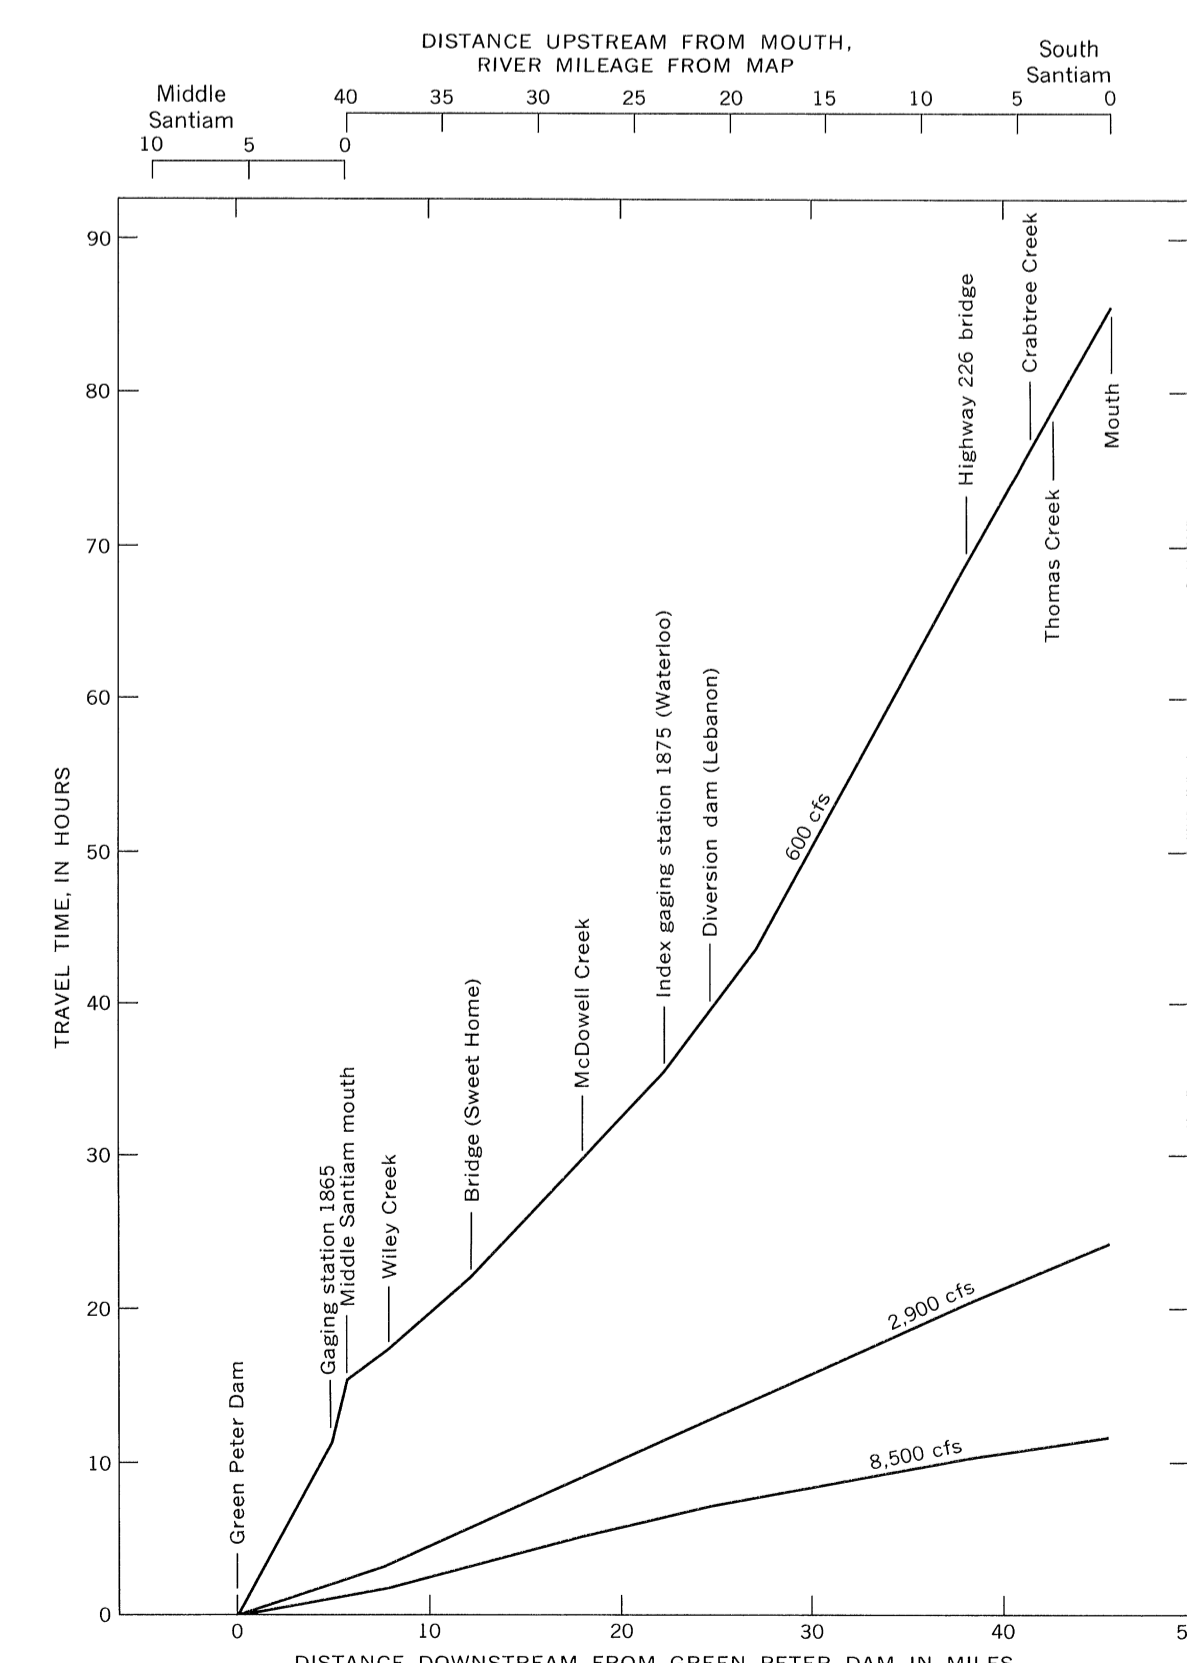

FIGURE 10.—Time of travel of Middle Santiam and South Santiam Rivers for selected discharges at index gaging station 1875 (Waterloo).
