Atitude and Configuration of the Bedrock Surface

The map of the altitude of the bedrock surface Fig 2 was obtained from U.S. Geological Survey 7.5-minute quadrangle maps. The bedrock surface was contoured at markings of 30 feet. The altitude of the bedrock surface relative to sea level is also shown in the right hand frame. The data for the contours is from the U.S. Geological Survey 7.5-minute quadrangle maps. The altitude of the bedrock surface was determined by means of a cathodoluminescent detector designed for this purpose. The bedrock surface was contoured at marking of 30 feet. The altitude of the bedrock surface relative to sea level is also shown in the right hand frame.
