GEORGIA

HYDROLOGIC UNIT MAP—1974
STATE OF GEORGIA

Scale 1:500,000
1 inch equals approximately 8 miles

10 0 10 20 30 40 Miles
10 0 10 20 30 40 50 Kilometers

Datum is mean sea level

Compiled, edited, and published by the Geological Survey. 1927 North American datum
Lambert conformal conic projection based on standard parallels 33° and 45°

LEGEND

- State capital
- County seat
- City, town, or village
- Scheduled service airport
- Built-up area shown for towns over 10,000 population
- County boundary

SOURCE DATA

BASE MAP
Drainage modified 1974

COMPILED IN 1963
EDITION OF 1970

POPULATION KEY

ATLANTA ..... more than 100,000
MACON ..... 50,000 to 100,000
Rome ..... 10,000 to 50,000
Statesboro ..... 2,500 to 10,000
Andersonville ..... less than 2,500

Population indicated by size of letters

EXPLANATION

This map and accompanying table show Hydrologic Units that are basically hydrographic in nature. The Cataloging Units shown will supplant the Cataloging Units previously used by the U.S. Geological Survey in its Catalog of Information on Water Data (1966–72). The previous U.S. Geological Survey Catalog-Indexing System was by map number and letter, such as 49M. The boundaries as shown have been adapted from "The Catalog of Information on Water Data" (1972), "Water Resources Regions and Subregions for the National Assessment of Water and Related Land Resources" by the U.S. Water Resources Council (1970), "River Basins of the United States" by the U.S. Soil Conservation Service (1963, 1970), "River Basin Maps Showing Hydrologic Stations" by the Inter-Agency Committee on Water Resources, Subcommittee on Hydrology (1961), and State planning maps.

The Political Subdivision Code has been adopted from "Counties and County Equivalents of the States of the United States" presented in Federal Information Processing Standards Publication 6-2, issued by the National Bureau of Standards (1973) in which each county or county equivalent is identified by a 2-character State code and a 3-character county code.

The Regions, Subregions and Accounting Units are aggregates of the Cataloging Units. The Regions and Subregions are currently (1974) used by the U.S. Water Resources Council for comprehensive planning, including the National Assessment, and as a standard geographical framework for more detailed water and related land-resources planning. The Accounting Units are those currently (1974) in use by the U.S. Geological Survey for managing the National Water Data Network.

HYDROLOGIC UNIT CODE

Region — Accounting Unit
Subregion — Cataloging Unit
03060103

Regional Boundary
Subregional Boundary
Accounting Unit Boundary
Cataloging Unit Boundary

The Regional and Subregional Boundaries serve as Accounting Unit Boundaries as well as Cataloging Unit Boundaries

POLITICAL SUBDIVISION CODE

073
County or County Equivalent Code

The State code for Georgia is 13.
The code is not shown on the map.

The following table shows the Hydrologic Units for the State

Region	Subregion	Accounting Unit	Cataloging Unit
03 South Atlantic-Gulf	06	01	02, 03, 04, 05, 06, 08, 09
		02	01, 02, 03, 04
	07	01	01, 02, 03, 04, 05, 06, 07
		02	01, 02, 03, 04
	11	01	03
		02	01, 02, 03, 04
	12	00	01, 02, 03
	13	00	01, 02, 03, 04, 05, 06, 07 08, 09, 10, 11
	15	01	01, 02, 03, 04, 05, 08
06 Tennessee	01	02	02
	02	00	01, 02, 03
	03	00	01
