

HYDROLOGIC UNIT MAP—1988

STATES OF MASSACHUSETTS RHODE ISLAND AND CONNECTICUT

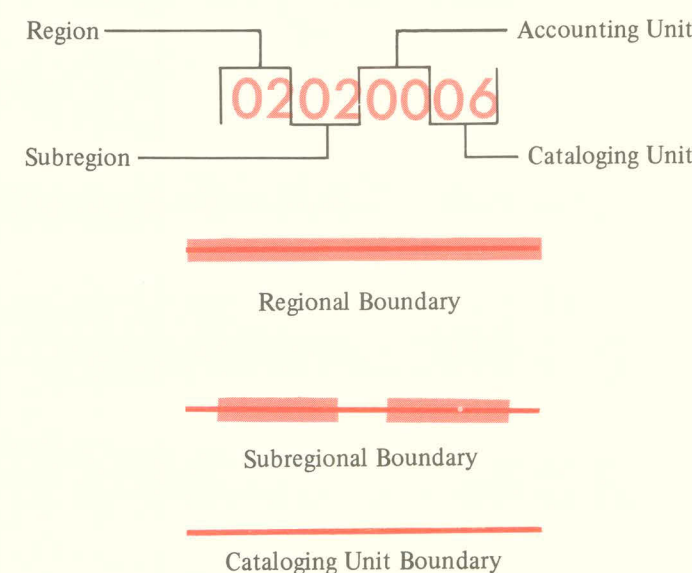

EXPLANATION

This map and accompanying table show Hydrologic Units that are basically hydrographic in nature. The Cataloging Units shown will supplant the Cataloging Units previously used by the U.S. Geological Survey in its Catalog of Information on Water Data (1966-72). The previous U.S. Geological Survey Catalog-Indexing System was by map number and letter, such as 49M. The boundaries as shown have been adapted from "The Catalog of Information on Water Data" (1972), "Water Resources Regions and Subregions for the National Assessment of Water and Related Land Resources" by the U.S. Water Resources Council (1970), "River Basins of the United States" by the U.S. Soil Conservation Service (1963, 1970), "River Basin Maps Showing Hydrologic Stations" by the Inter-Agency Committee on Water Resources, Subcommittee on Hydrology (1961), and State planning maps.

The Political Subdivision Code has been adopted from "Counties and County Equivalents of the States of the United States" presented in Federal Information Processing Standards Publication 6-2, issued by the National Bureau of Standards (1973) in which each county or county equivalent is identified by a 2-character State code and a 3-character county code.

The Regions, Subregions and Accounting Units are aggregates of the Cataloging Units. The Regions and Subregions are currently (1974) used by the U.S. Water Resources Council for comprehensive planning, including the National Assessment, and as a standard geographical framework for more detailed water and related land-resources planning. The Accounting Units are those currently (1974) in use by the U.S. Geological Survey for managing the National Water Data Network.

HYDROLOGIC UNIT CODE

The Regional and Subregional Boundaries serve as Accounting Unit Boundaries as well as Cataloging Unit Boundaries

POLITICAL SUBDIVISION CODE

001
County or County Equivalent Code

The State code for Massachusetts is 25, Rhode Island is 44 and Connecticut is 09. These codes are not shown on the map.

The following table shows the Hydrologic Units for the States

Region	Subregion	Accounting Unit	Cataloging Units
New England	06	00	03
	07	00	02, 04, 05
	08	02	01, 02, 03, 04, 05
	09	00	06, 07
	10	00	01, 02, 03, 04, 05
Mid Atlantic	02	00	03, 06
	03	01	01, 02

Compiled, edited and published by Geological Survey
1927 North American datum
Datum is mean sea level

SOURCE DATA
U. S. Dept. of the Interior — Geological Survey Topographic maps.
War Department — Corps of Engineers Topographic maps.
Federal Works Agency — Public Roads Administration County maps.

Scale 1:500,000

Approximately 1 inch equals 8 miles

0 10 20 30 40 50 Miles

0 10 20 30 40 50 Kilometers

Lambert conformal conic projection
Standard parallels 33° and 45°

INTERIOR—GEOLOGICAL SURVEY, RESTON, VIRGINIA—1988

LEGEND

- State Capital
- County Seat
- Cities, towns or villages
- Corporate boundary shown for towns over 25,000 population

POPULATION KEY

- BOSTON: More than 500,000
 - PROVIDENCE: 100,000 to 500,000
 - Waterbury: 25,000 to 100,000
 - Norwich: Less than 25,000
- Population indicated by size of letters

MASS.-R. I.-CONN.
