

MAP LEGEND
POPULATED PLACES
Town
Village
Village, name not given
Ruins
Cultivated areas, date gardens
TRANSPORTATION
Major road
Secondary road
Road of questionable per-
manency
Camel trail
HYDROGRAPHIC FEATURES
Only isolated wells are shown.
Dug well
Drilled water well
Intermittent stream
Reef
HYDROGRAPHIC FEATURES
Generalized relief
Sand
Dune stipple represents mobile sand and composed primarily of dunes, linear ridges, and other individual sand forms, that are shown where map scale permits; moderately dense stipple represents more stabilized continuous sand cover; open stipple represents discontinuous sand cover.
Types of sand terrain
Transverse. Predominantly dunes and composed primarily of dunes, linear ridges, and other individual sand forms, that are shown where map scale permits; moderately dense stipple represents more stabilized continuous sand cover; open stipple represents discontinuous sand cover.
Longitudinal. Primarily dunes and composed primarily of dunes, linear ridges, and other individual sand forms, that are shown where map scale permits; moderately dense stipple represents more stabilized continuous sand cover; open stipple represents discontinuous sand cover.
Urgu. Various forms of long, nearly parallel, sharp crested narrow sand ridges and dune chains separated by broad and wetland, usually including elements of type I sand terrain. These are the resultant of a system of two dominant wind directions and are identified in the sandy dunes of North Africa.
Sand mountains. Dominated by large sand masses commonly creating a low surface along the escarpment, often with superimposed dune forms consisting of various types of complex barochons. Common forms are giant barochons opening several kilometers from horn to horn; giant barochons and pyramidal sand peaks as well as other less common peak forms, and giant oval to elongate and rounded.
MISCELLANEOUS FEATURES
Spot elevation in meters
Elevation on top of escarpment after H. Thengy
Bathymetric contour, in meters
Mine

GLOSSARY

عين	Ayn	Spring, solution pit, or well
بر	Br	Dug well
دكة	Dikka (h)	Eolian sand terrain dominated by hummocks accumulated about small bushes and grass clumps
حصن	Harrath (t)	Field of lava and volcanic ejecta
حصن	Ujra	Fort
جبل	Jabal, pl., Jibāl	Hill or mountain
جزيرة	Jazir	Island
رأس	Ra's	Cape
سهل	Sahl	Plain
سوق	Suq	Market place
وادي	Wadi	Valley or dry water course
