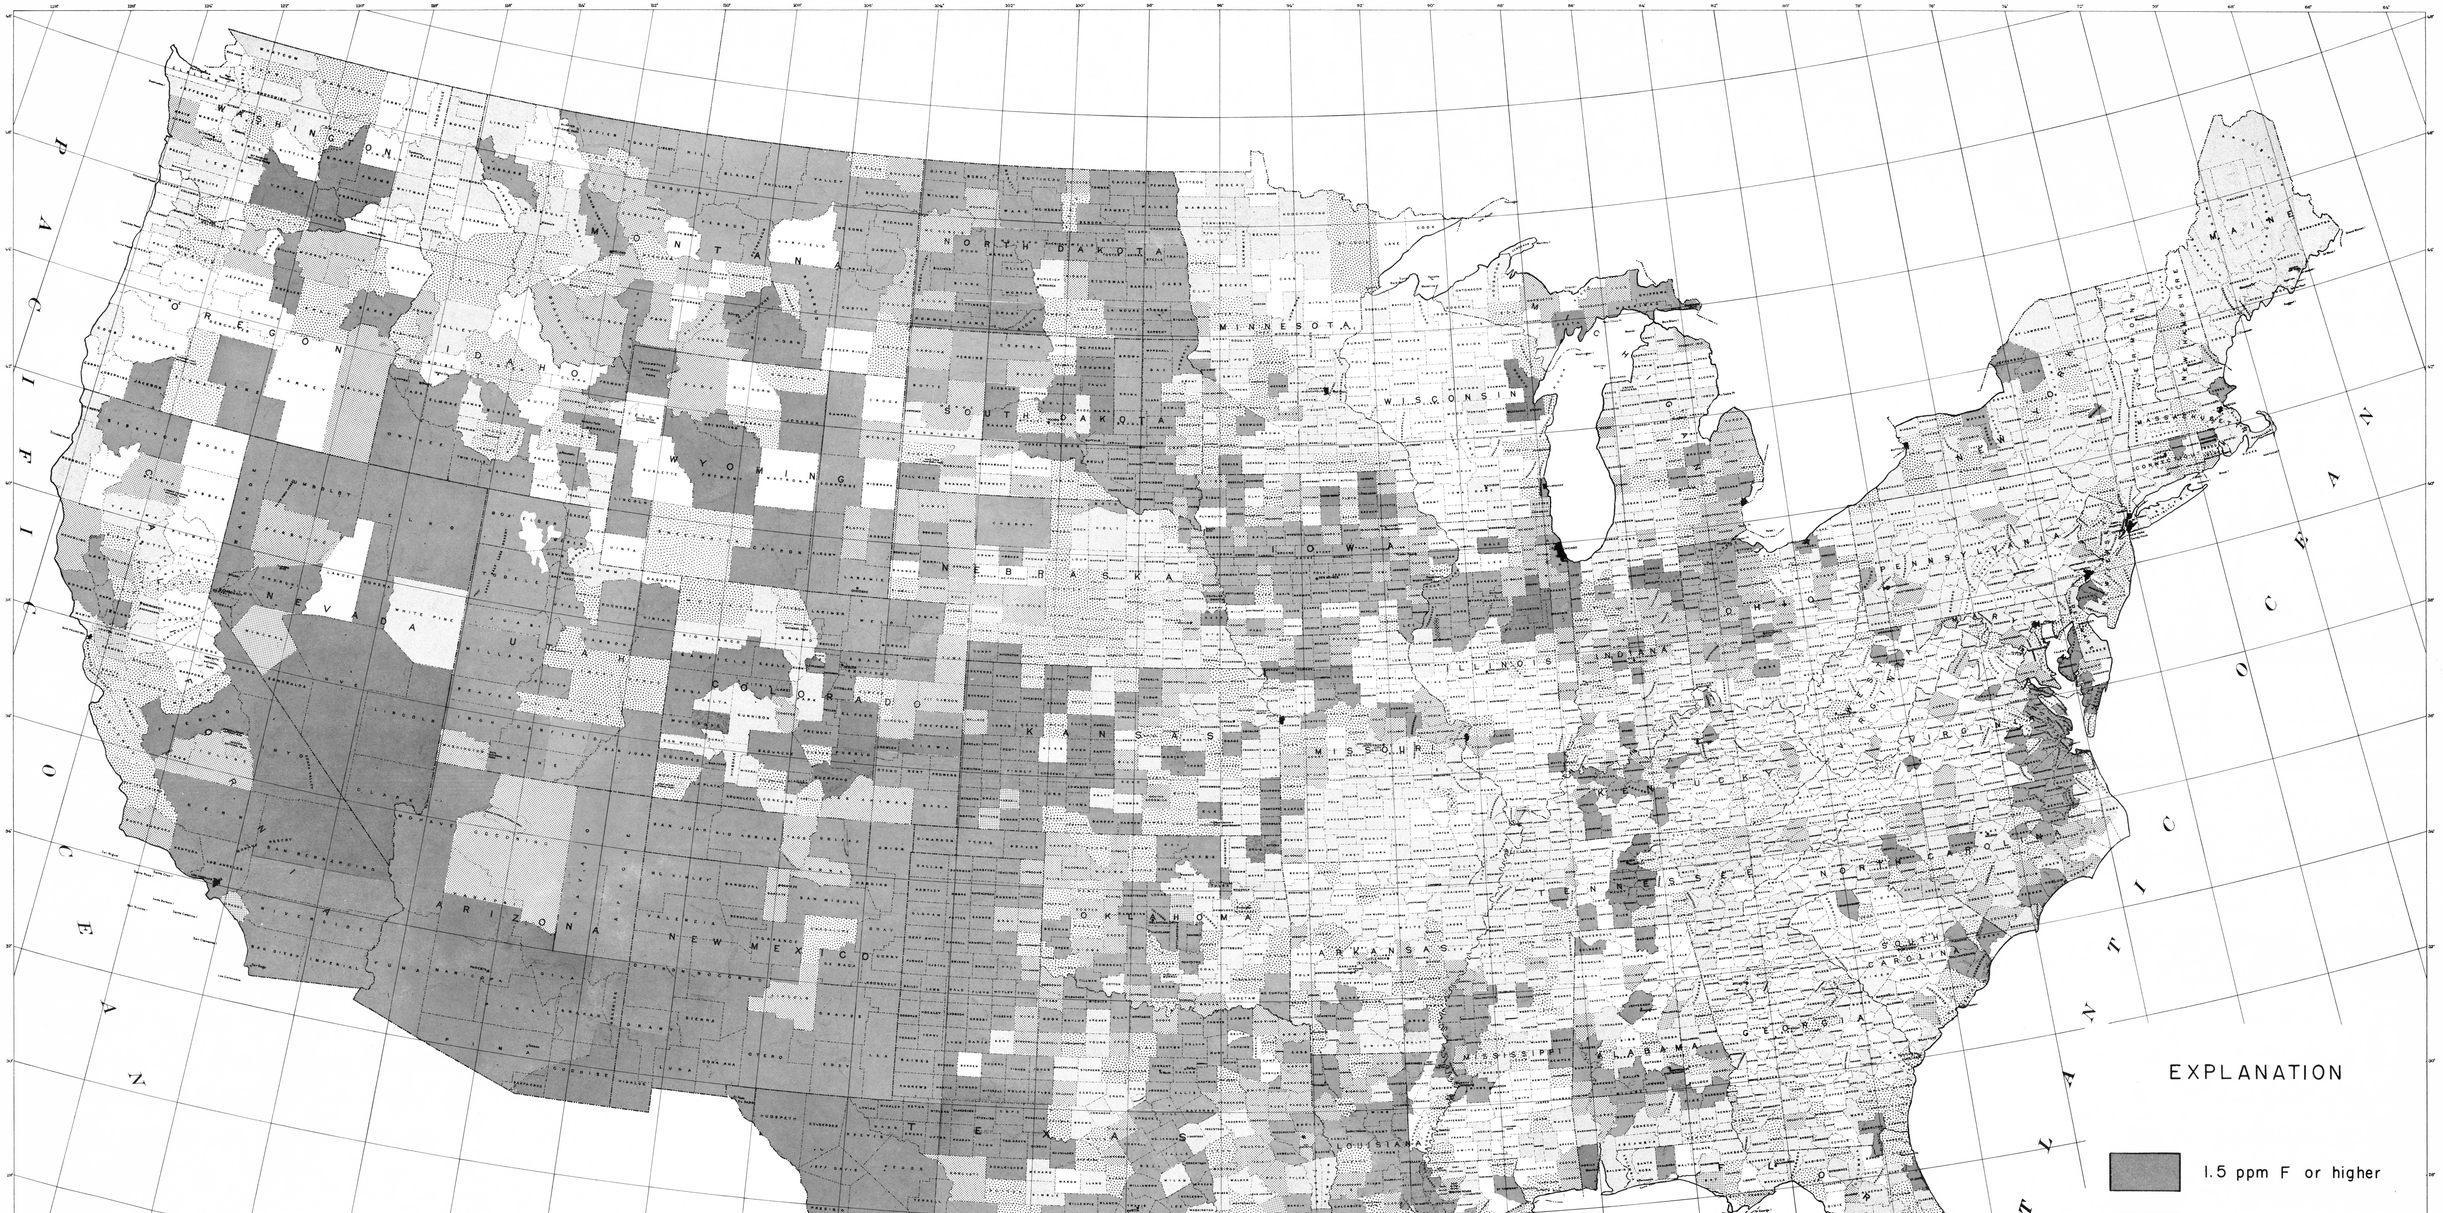
UNITED STATES GEOLOGICAL SURVEY

MISCELLANEOUS GEOLOGICAL INVESTIGATIONS
MAP I-387



NOTE

This map shows the maximum (not the average) content of ground water (whether potable or not) reported in published literature as of June, 1962, mainly U.S. Geological Survey Water-Supply papers and publications of State geological surveys. The average value is in many cases much less than the indicated maximum value

Base map by Topographic Division
U.S. Geological Survey, 1933

FLUORIDE CONTENT OF GROUND WATER IN THE CONTERMINOUS UNITED STATES

(Maximum reported value for each county)
