

# N.W. FRONTIER PAKISTAN

SATELLITE IMAGE MAP

SCALE: 1:500 000

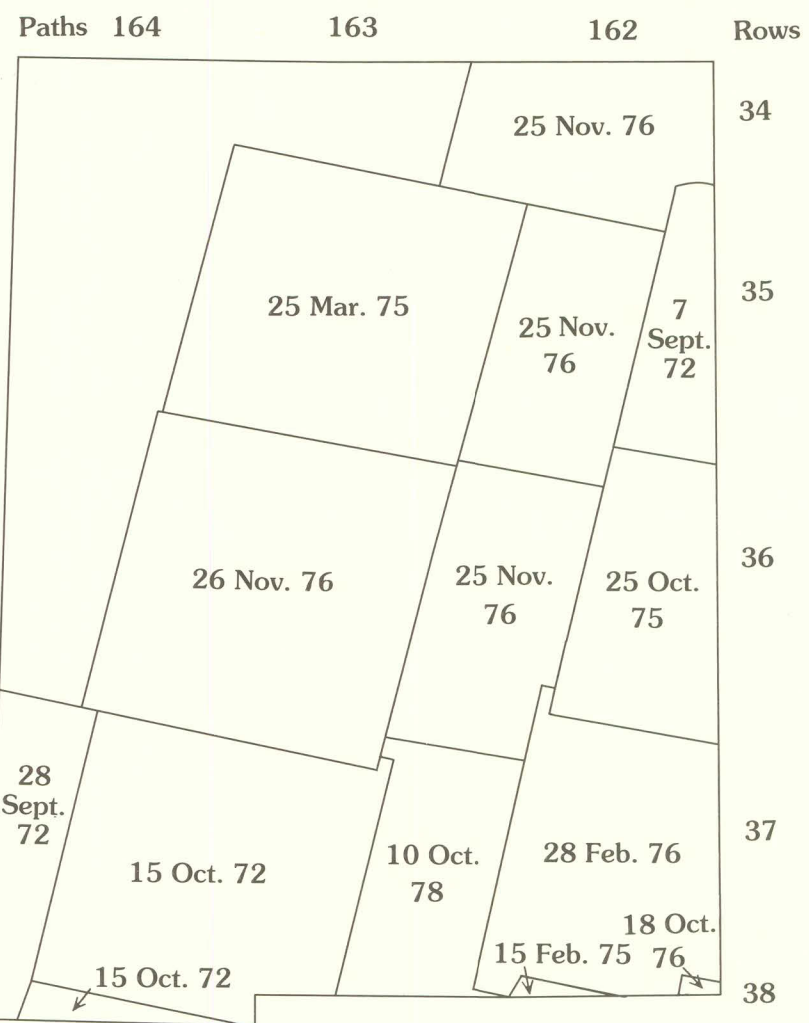

Lambert conformal conic projection.  
Standard parallels: 26° and 34° N.  
Extremes: spherical.

Images recorded by the Landsat Multi Spectral Scanner in the multi-spectral mode, composed of spectral bands:  
1 (0.5-0.6  $\mu$ m., yellow-green),  
2 (0.6-0.7  $\mu$ m., red), and  
4 (0.8-1.1  $\mu$ m., near-infrared), printed in the yellow, red, and blue sequence.

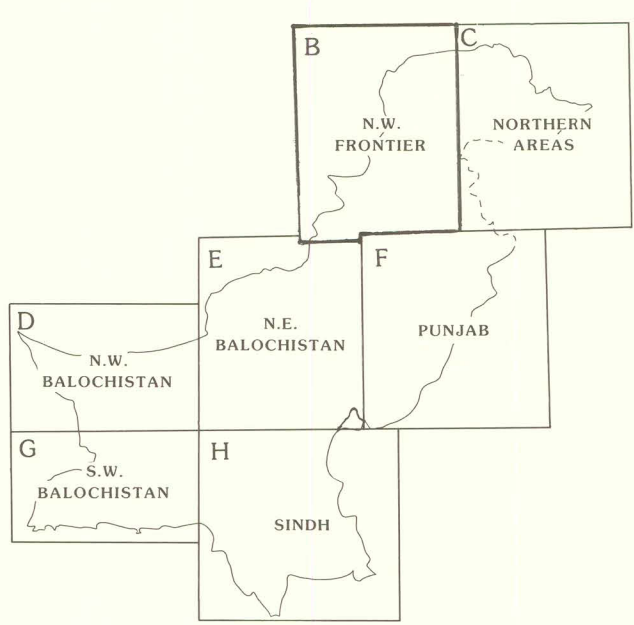

Vegetation shown in reds, tree-covered areas in dark reddish brown.

## LANDSAT SCENES INDEX

Technical information about this image map may be obtained from Mail Stop 917, U.S. Geological Survey National Center, Reston, VA 20192, USA.  
Information on indexing, cost, and availability of Landsat data may be obtained from U.S. Geological Survey, EROS Data Center, Customer Services, Sioux Falls, S.D. 57198, USA.

## LOCATION DIAGRAM

This sheet is part of a set of 7 image maps at the 1:500 000 scale and a composite image map at the 1:2 000 000 scale (sheet I-2587-A).

Geographic names and their spellings do not necessarily reflect recognition of the political status of an area by the United States Government.

This image map is not an authority on the delineation of international boundaries.
