GEOLOGIC MAP OF THE CIENEGA SCHOOL QUADRANGLE, OTERO COUNTY, NEW MEXICO, AND HUDSPETH COUNTY, TEXAS

By

J. Michael O'Neill

1999

DESCRIPTION OF MAP DATA

Geologic maps are drawn at a scale of 1:24,000 and are geologically interpreted by the U.S. Geological Survey (USGS). The maps show the location and distribution of rock units and the various types of geologic structures. The map symbols used on the map are as follows:

- Solid black lines represent faults.
- Dotted lines represent 10-foot contours.
- Blue symbols represent water bodies.
- Yellow symbols represent desert vegetation.
- Green symbols represent vegetation.

The map is divided into several quadrangles, each covering a specific area of the study region. The quadrangles are labeled with the names of the towns and cities located within the quadrangles.

The map also includes a legend that explains the symbols used on the map. The legend is located on the right side of the map.

The map is published by the U.S. Geological Survey and is available for purchase through their website or at their sales offices.
