

EXPLANATION

Map shows stream systems and drainage areas that contribute streamflow to selected sites on streams.

Drainage areas shown have not been adjusted for the manmade changes in the natural regimens such as storm sewers, diversion dams, canals, and tunnels.

- STREAM SYSTEMS**
- STREAM SYSTEMS
 - AREA DRAINED BY THE MATTABESSET RIVER SYSTEM (Tributary to the Connecticut River)
 - AREA DRAINED BY THE PARK RIVER SYSTEM (Tributary to the Connecticut River)
 - AREA DRAINED BY SMALLER STREAM SYSTEMS TRIBUTARY TO THE CONNECTICUT RIVER
 - DRAINAGE DIVIDE BETWEEN STREAM SYSTEMS
 - DRAINAGE-AREA BOUNDARY

TOTAL DRAINAGE AREA- Number indicates area in square miles that contributes streamflow to selected site on a stream (area in square miles x 2.59 = area in square kilometers). Where the selected site is a mouth of tributary stream, generally two numbers and associated drainage-area boundaries are shown. One number is the square miles of drainage area of tributary stream at its mouth, and the other number is the square miles of drainage area of the larger or main stream immediately upstream from the mouth of tributary stream. The square miles of drainage area of the larger or main stream immediately downstream from the mouth of tributary stream is, therefore, the sum of the two numbers shown.

- SELECTED SITES**
Symbols may be superimposed
- STREAM-GAGING SITE
 - SURFACE-WATER SAMPLING SITE
 - OUTLET OF SURFACE-WATER IMPOUNDMENT
 - MOUTH OF TRIBUTARY STREAM
 - SUPPLEMENTAL SITE
 - GENERALIZED DIRECTION OF STREAMFLOW

Thomas, M.P., 1972, Gazetteer of natural drainage areas of streams and water bodies within the State of Connecticut: Connecticut Dept. of Environmental Protection Bull. 1, 89 p.

Base from U.S. Geological Survey 1984 10,000-foot grid based on Connecticut coordinate system 1000-meter Universal Transverse Mercator grid ticks, zone 18, shown in black

SCALE 1:24000

CONTOUR INTERVAL 10 FEET
DATUM IS MEAN SEA LEVEL
DEPTH CURVES AND SOUNDINGS IN FEET-DATUM IS MEAN LOW WATER
SHORELINE SHOWN REPRESENTS THE APPROXIMATE LINE OF MEAN HIGH WATER
THE MEAN RANGE OF TIDE IS APPROXIMATELY 1.7 FEET
