# INDEX TO POTASSIUM-ARGON AGES OF CENOZOIC VOLCANIC ROCKS OF OREGON

By George W. Walker, G. Brent Dalrymple and Marvin A. Lanphere, 1974

This document contains a table and diagram providing potassium-argon ages of Cenozoic volcanic rocks in Oregon. The data includes locations, sample descriptions, and age determinations. The table is structured to list samples by location, with columns for location, sample description, and age in millions of years ago. The diagram appears to illustrate some of the geographical distribution or stratigraphic relationships of these samples.

For detailed reading and analysis, the entire document must be consulted.
