CONTOUR MAP OF THE BEDROCK SURFACE, GUILFORD QUADRANGLE, CONNECTICUT

By

F. P. Haeni

1974

EXPLANATION

Contours show the altitude of the bedrock surface. The position of the contours is based largely on data from wells, test holes, and the published geologic maps supplemented by knowledge of the geologic history of the region.

The map shows the configuration of the bedrock surface if all unconsolidated earth materials were removed.

—50—

CONTOUR, In feet above or below (-) mean sea sea level. Hachures show closed depressions. Contour interval 50 feet (15 meters).
